- Awning
- Compact microwave
- California emission engine

Vehicle Loading—Every effort has been made to provide the greatest number of options for the motorhome owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the motorhome.

Dry weights based on standard features, optional equipment not included. Carrying capacities determined by subtracting dry gross weight from GVWR and includes fluids, options and cargo. Liquid capacities and weights are approximations only.

This brochure is printed on recycled paper as part of Thor Industries' corporate effort to minimize waste and conserve our natural resources. Providing safe, fuel efficient recreational vehicles is Thor Industries' way of further demonstrating our role as the industry leader in safeguarding our nation's environment.
