1956 Cruiser & "Overlander" 26'

Ohio | O-7145 to O-7358
California | 6NNN
California had the "whale-tail rear end-cap, changing over to 7 end-cap panels next year."
Beautiful, but lightweight, birch cabinetry and a PreWay full size apartment rang with a large 110v only refer. The 26 foot Crusie was designed for more "over the road" travel, while the simpler "Overlander" was designe for off-road, roughing-i style camping,
Ohio had the slope back
plain 13 panel end-caps:
the mid 1950's
This example had a Marvel 110v/icebox refer and a smaller range, typical of the Overlander.
