

S A F A R I

The favorite of those seeking versatility and flexibility in trailer travel, the Safari is remarkably spacious in a maneuverable, easily towed package. Lighter by 1,000 pounds, the Safari can be towed by many of today's most popular sport/utility vehicles and mini-vans, yet you won't have to sacrifice comfort or convenience.

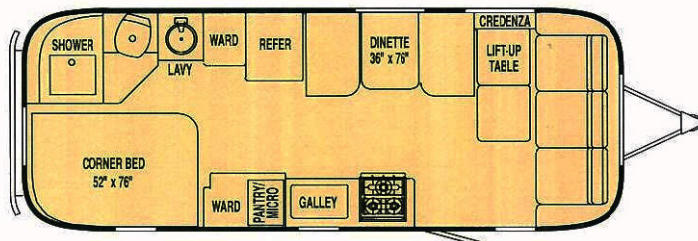

Taking its inspiration from the International, the all-new Safari features laminated surfaces throughout its interior for lighter weight and greater durability. Gently rounded overhead compartment doors and brushed nickel hardware give the Safari a fresh, contemporary look that nonetheless acknowledges Airstream's heritage. Stylish fabrics have been carefully chosen for a warm, inviting look. Safari's floor plans reflect Airstream's decades of experience: appliances and furnishings are positioned for maximum convenience in a small space, and one model can sleep up to six people.
