BIG FOOT has done it again! Responding to the demands of the energy-conscious buyer of today, we have brought out our new series of lightweight travel trailers.

Utilizing the proven construction techniques pioneered by the successful line of BIGFOOT trailers, the laminated wall construction increases the usable interior space over stick-built units, but there is no compromise on the insulation in the BIGFOOT travel trailer. Famous Styrofoam SM<sup>®</sup>, one of the world's best insulation materials (with 2½ times the insulating value of fiberglass insulation), completely surrounds the BIGFOOT B17 — even the floor and wheelwells — usually left uninsulated in other makes. Not in a BIGFOOT. The warmth of Styrofoam SM<sup>®</sup> completely surrounds you, and together with the insulated curtains and the 12,000 BTU forced air furnace, keeps you warm and comfortable during those crisp autumn nights.

BIGFOOT'S B17 offers both convenience and practicality. The interior is large and comfortable, yet has been designed to be easily cleaned. Warm wood panelling and color co-ordinated fabrics make it a pleasure to relax in such comfortable surroundings. Enjoy the scenery through the generously sized, bronze-tinted windows. Whether you are a hunter, an explorer or a traveller, you will appreciate the touches of luxury as well as the practical aspects of this carefully engineered travel trailer. Storage space and cupboards abound — there's a place for everything in a BIGFOOT. You will be impressed with the extensive list of standard features and amazed at the options available.

Three models to choose from. The Standard model that provides all that is required for comfortable living. The Deluxe adds the luxury of hot water and shower. The SPIRITWING is for those who desire most options and that little extra class.
