CAMPING TRAILERS

FTCA, Inc.
Manufacturer of Coleman® Camping Trailers

2009

the history of Coleman® Camping Trailers

Continuing the Legacy of Quality, Value and Fun in the Great Outdoors!

What's in a name? If that name is Coleman®, the answer is over a century of trust, built by providing innovative, high-quality products for people to explore and enjoy the outdoors.

We're FTCA, Inc. We build Coleman® Camping Trailers, and we love the outdoors. It's in our nature and our nurture, because camping trailers have been our focus since 1966 when the seeds of our company were planted in the Laurel Highlands of Western Pennsylvania. The story goes that Sheldon Coleman Sr. personally selected our location because he enjoyed hunting and fishing amongst our pristine forests and streams. We believe he also appreciated the hardworking ethics and values he found amongst the craftspeople, coal miners and family farmers in America's rural heartland. If your outdoor passions include hunting and fishing, or favor kayaking, bicycling and hiking, we invite you to visit us in scenic Somerset, PA, just 60 miles southeast of Pittsburgh.

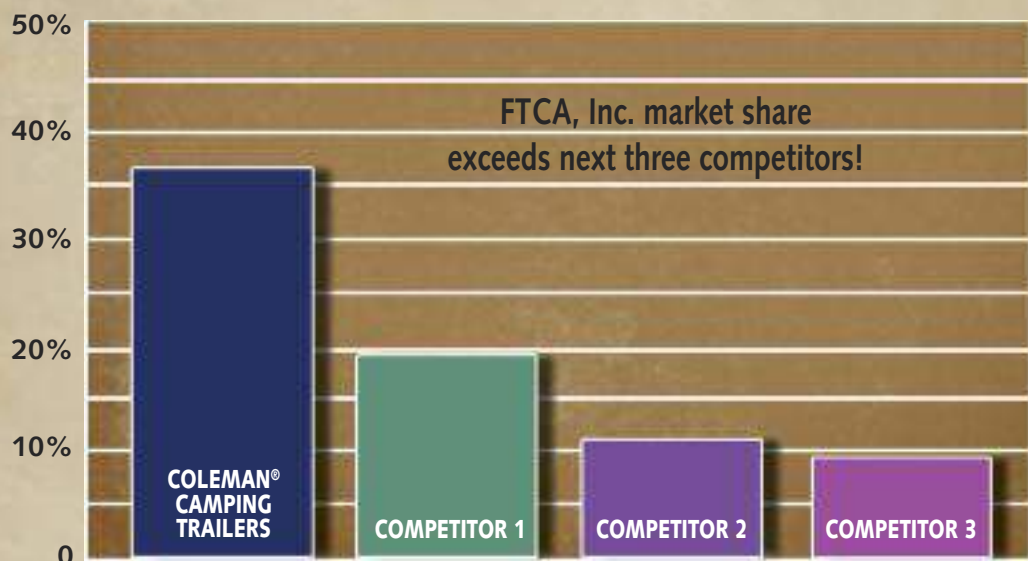

By 1979, Coleman® Camping Trailers had become North America's best selling brand of camping trailer, an honor we still earn today with each trailer and each satisfied customer. Perhaps it's only natural for the most trusted camping trailers to originate from our surroundings. We believe people who enjoy our camping trailers are, by nature, environmentally conscious. We also believe they appreciate that our trailers can be towed by smaller, more fuel-efficient vehicles and that we design them for self-contained use in natural, low environmental impact campsites. We're campers too, and we urge everyone to respect our environment by taking only photographs and leaving only footprints.

Folding camping trailers are the top of our line. In fact, they're all we do, and we do them better than anyone else. You work hard for your leisure time and you deserve the best. Trust the name you know – Coleman® Camping Trailers.

North America's Number One Choice*

*Source: Statistical Surveys, Inc., May 2008

World Class Quality and Distribution

FTCA, Inc. distributes camping trailers to discerning customers all around the world.

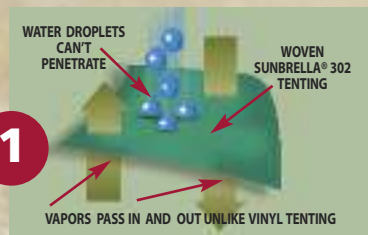

choose Coleman® Camping Trailers superiority...

Windows & Sunbrella 302 Tenting

- Fine mesh screening in our windows – the tighter the mesh, the fewer the bugs to get inside
- Clear vinyl windows allow more natural light in and do not attract the heat like tinted vinyl windows

- Sunbrella 302 is inherently water repellent and requires no periodic treatments
- Sunbrella 302 resists mildew, dry rot, fading and cracking, and is hypoallergenic
- Sunbrella 302 is formulated to meet or exceed all federal code standards for flammability
- Sunbrella 302 is made of breathable tightly woven acrylic material and does not trap heat or moisture

Lift System

- Stainless steel lift posts will not corrode, or bind, and do not need to be protected from rain by tent flaps
- Posts are bolted directly to the trailer's frame, not screwed to the floor and are designed to channel rain water harmlessly to the ground and not into the trailer
- Our lift system is user friendly with no need for an over-crank warning cable – ours can not be over cranked, and our system does not require you to install additional support posts
- We manufacture our own high-quality stainless steel posts and use independent aircraft grade stainless steel cables for each lift post
- The "Posi-Lock" crank system allows the operator to stop and release the crank handle without fear of kick-back or free-fall
- Our time tested lift system was designed and built by our engineers and has been in use for over 40 years

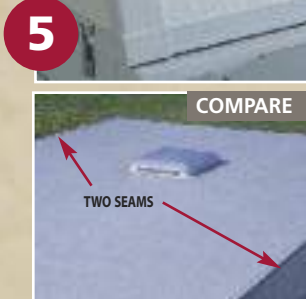

Frame & Suspension

- Full perimeter tubular steel frame offers strength and durability
- Heavy duty tubular steel chassis
- Steel bulkheads
- To ensure a long lasting finish, our frames are E-coated using a 12-step process to protect against rust and corrosion. This process meets the strict standard of military specifications TTC-940E Type 1.
- Trailer wiring is protected inside the frame members to prevent damage from stones and other road debris

Roof

- Americana LE, Destiny, and Evolution Series Cobalt roofs feature durable aluminum exterior skins, folded along four sides to provide greater side wall strength without additional seams
- Highlander, Americana, and Evolution (exc. Cobalt) series roofs feature a cambered, one-piece, front to rear fiberglass skin, and full-length aluminum rails that integrate our exclusive roof rack tracks

Exterior Body

- All models feature galvanized and painted side body panels that are riveted to the trailer framework for flexibility and durability, and permit easy and inexpensive replacement if ever damaged
- Exclusive Krystal Kote finish on side body panels that resists scratching
- Americana and Americana LE Series front and rear body panels are thermoformed of impact resistant TPO
- Diamond plate accents on Destiny, Highlander, and Evolution Series

Screen Door

- The industry's easiest to place one-piece screen door requires no assembly
- It's self-contained in a single frame so the trailer does not need to be perfectly level for installation
- A full 24 1/2 inches wide, also the widest in the industry
- The door handle is located at waist-level for easy use without stooping or bending to reach
- The automatic spring-loaded door return provides automatic closing
- Does not require the outside access door to be removed and stored under a bed

Axles

- Electric brakes are standard on all models regardless of size or weight. Your safety is our number one priority
- We use only five-bolt wheels. Some competitors use four-bolt wheels
- We use only EZ Lube axles that permit easy maintenance

Floor & Bed Platform

- One-piece Weyerhaeuser Structurwood® eliminates seams, warping, buckling and delaminating
- 100% quality control provides consistent panels with no soft spots, knotholes, or core voids
- Our use of Structurewood is so dependable that Weyerhaeuser agrees with our practice of not coating the exposed bottom surfaces

Beds

- Americana, Highlander, and Evolution (exc. Cobalt) offer exclusive BackSaver bed support system for easy set-up without bending or stooping
- All beds feature self storing support legs that set up easily and can not be misplaced or lost
- The beds glide out with minimal effort and feature full-perimeter aluminum frames to prevent warping and binding; and we rate them to 1,100 lbs (750 lbs. on Cobalt) capacity
- Our mattresses feature a comfort-engineered polyester fiber that is hypoallergenic and comfortably soft and supportive

Outdoor Cooking

- Americana, Highlander, and Evolution (exc. Cobalt) models come standard with a high pressure, 2 burner, outside stove
- Americana LE models come standard with a portable indoor/outdoor stove
- Destiny models offer an outside grille as an optional accessory

Front Storage Trunk

- Patented design
- Impact and water-resistant rotational molded front storage trunk
- Easy access from top and side
- Inside can be washed out and drained with removable floor plug
- No gimmicky sliding mechanisms or two-piece lids to add weight and complexity

Galley and Furniture Design

- The patented Swing-Level galley in the Americana, Americana LE, and Evolution Series (exc. Cobalt) provide quick and easy setup and provide plenty of upper and lower storage
- Items do not need to be removed when traveling and the Swing-Level galley design provides a no-spill feature so items remain in place when positioning the galley
- Highlander Series feature a fixed residential style galley for spacious storage and no set-up
- All Highlander, Americana, and Evolution Series (exc. Cobalt) feature our exclusive seamless-edged countertops that provide superior moisture resistance and long-term good looks and also feature this same seamless laminate on their tables and hutch tops
- Most models offer a portable dinette table that can be used inside or out
- Highlander, Americana, and Evolution Series (exc. Cobalt) feature metal dinette frames that provide stronger support and lasting durability

choose Coleman® Camping Trailers quality...

Sunbrella 302® – the very best tenting fabric available, featured on all Coleman® Camping Trailers.

Camping should be a stress-free, relaxing experience for you, your family and friends. An investment in a quality Coleman® Camping Trailer means that your camping trips will be about good times, and not hassles. Coleman® Camping Trailers' Sunbrella 302 tenting is one key part of that promise.

Since 1992, Coleman® Camping Trailers have featured Sunbrella 302 fabric. Sunbrella 302 was specially developed exclusively for Coleman® Camping Trailers to meet Federal Motor Vehicle Safety Standard 302 for flame retardancy. Plus, it has Sunbrella's legendary durability and fade resistance, so your camper will continue to look great for years. Sunbrella is the world's leading brand of performance fabric, and can be found in awnings, canopies, cabanas, car tops, and furniture for outdoors as well as indoors. Sunbrella is also the world's #1 marine fabric – above or below deck.

Everyone loves to spend time outside. From the oceans to the mountains, tough, long-lasting Sunbrella handles the worst Mother Nature can give. From the baking sun to the endless rain, Sunbrella fabric looks great in any season.

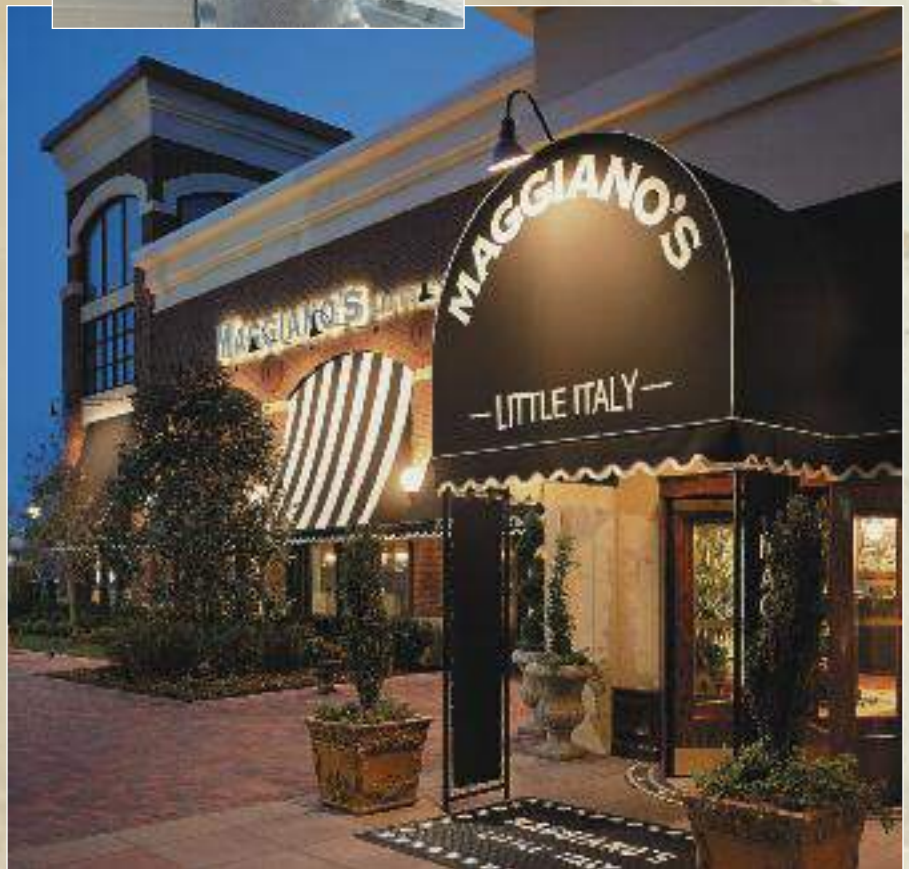

The shade is cool, and the look is hot. Whether for protective relief on a sun-kissed beach or comfortable cover for your smooth ride, Sunbrella's beauty – and its ability to stand up to the elements – is why Sunbrella is the practical way to add comfortable shade.

- Sunbrella 302 is unaffected by sunlight, chemicals, mildew and rot, making it long-lasting and far superior to cotton or canvas for outdoor use.
- Sunbrella 302 is breathable, and won't trap heat and moisture like vinyl or coated materials. It keeps you comfortable and stays fresh, without collecting musty odors.
- Sunbrella 302's color is locked into the fibers and won't run, wear or wash out. Stain-resistant and easily cleaned, Sunbrella will look great for years.
- With unsurpassed UV-resistance, Sunbrella's color and strength defy years of brilliant sunlight exposure. Plus, it's unaffected by dust, pollen, atmospheric chemicals and gifts from our feathered friends.
- Sunbrella 302 is water repellent and quick drying, keeping moisture out and making spring showers a thing to enjoy.
- Sunbrella 302 is extremely strong and abrasion-resistant, yet it's also lightweight and easy to handle.
- Sunbrella 302 won't shrink or stretch under normal use, so it will always fit perfectly.
- Sunbrella 302 won't harden, crack or peel regardless of exposure to the weather.

The elements show no mercy to a boat, which is why boat owners prefer Sunbrella, the #1 marine fabric in the world.

Sunbrella fabrics are the smart choice to protect and enhance interior and exterior applications.

Sunbrella is a registered trademark of Glen Raven, Inc.

choose a *Highlander Series* adventure

- AVALON
- NIAGARA
- SARATOGA

Experience the best of both worlds with our luxury Highlander Series – incomparable top-of-the-line comfort, features and easy towability.
Rated as North America's most popular "high side wall" folding camping trailer by Statistical Surveys, Inc.

SOLID WALL BATHROOM
Residential style privacy and convenience with a shower and flushable ceramic commode. Compatible with full-hook-up sites and non-hook-up sites. Patented.

- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this trailer when fully loaded. It includes all weight at the trailer axle(s) and tongue or pin.
- All unloaded weights are based on the heaviest factory configuration of every model and do not include accessories.
- Maximum Carrying Capacity is determined by subtracting Gross Dry Weight from the GVWR. The Maximum Carrying Capacity does NOT include the weight of fresh water, propane, or water in the water heater.
- Trailer open width includes slide-out step and/or slide-out.
- Water weight equals 8.3 lbs. per gallon. Propane Gas weight equals 4.2 lbs. per gallon.
- Hitch weights are dependent upon how the trailer is equipped with accessories, on board cargo and tank fluid levels. Actual hitch weights may be higher or lower than shown. It is recommended that the tow vehicle and hitch for your trailer have sufficient capacity to accommodate actual usage.
- Some accessories may be dealer installed.
- Installed accessory weights will decrease the cargo carrying capacity. Consult Owner's Manual for accessory weights.
- Storage trunk models equipped with hot water have reduced cargo capacity because of hot water heater location.
- Refrigerator, furnace, cassette potti, water heater, outside shower and power lift are factory installed accessories.

Experience the Fuel Savings and Easy Tow and Stow Features of a Coleman® Camping Trailer

- Many communities ban residential parking of large RVs, unless they are garaged. Unlike travel trailers, Coleman® Camping Trailers can be garaged. Being able to store your RV in your garage will likely save you hundreds or even thousands of dollars each year in storage fees, maintenance costs and insurance premiums as well as increase future resale value.
- Since Coleman® Camping Trailers can be towed by smaller, more fuel efficient vehicles, you will be saving money not just while towing, but also in everyday driving.
- Large tow vehicles and travel trailer combinations can be difficult and time consuming to maneuver into many campsites – especially the desirable secluded or more primitive natural sites. Coleman® Camping Trailers are easy to maneuver – that means less time spent setting up camp and more time taking it easy and enjoying camp.

Compare the Cost Saving Advantages of Coleman® Camping Trailers vs Full Size Travel Trailers

Compare the Avalon's spacious liveability to a comparably sized travel trailer floorplan.

If your budget has been pinched by rising fuel prices, you are probably considering a more fuel efficient smaller vehicle. But if you are thinking a smaller tow vehicle means you can not enjoy the amenities of a full featured travel trailer, think again! Coleman® Camping Trailers offer comparable comforts and conveniences in an easier to tow and stow lightweight package.

With Coleman® Camping Trailers, you can enjoy the everyday savings of a more fuel efficient tow vehicle without compromising your active lifestyle.

Whether your lifestyle is back to the basics camping, motorsports and camping, or getting away from home with all the comforts of home, we have an exciting and economical folding camping trailer that is right for you.

- Low towing profile means less frontal and side wind resistance for greater fuel economy and easier towing.
- Efficient size to weight ratio allows use of smaller, more fuel efficient tow vehicles without giving up living space.
- Compact towing proportions provide greater all around vision and confidence when towing and maneuvering.
- Single axle (exc. Avalon and E4) design with short rear overhang allows tighter turning radius and easier maneuvering.
- Store your trailer in your garage – eliminates storage costs and eliminates driving to and from storage facility.

choose *Accessories* for added convenience

The selection of accessories for Coleman® Camping Trailers can help you personalize and enhance your living space. Customize the inside and outside of your Coleman® Camping Trailer with the great options shown here and make your camping experience more convenient and comfortable.

choose your Coleman® Camping Trailer today!

To learn more about Coleman® Camping Trailers and to find a dealer near you, please visit www.colemantrailers.com or call 1-814-445-9661. You can also write to us at: FTCA, Inc., 258 Beacon Street, PO Box 111, Somerset, Pa 15501-0111.

To our customers:

To make sure that you get the maximum satisfaction out of your recreational vehicle purchase, there are several things you should know:

1. Learn all you can about the folding camping trailer you are planning to buy. Do not rely on word of mouth. Get the facts about the actual trailer length, width, Unloaded Vehicle Weight, Gross Vehicle Weight Rating and Maximum Carrying Capacity. These are available in the manufacturer's sales literature or from the Maximum Carrying Capacity label located in each trailer. Be sure to check this information before you decide which unit to buy.
2. Verify the towing capacity of your tow vehicle. If you do not know, or are not sure, you can ask at your automotive dealership. Be sure to match the vehicle tow rating to the loaded (not dry) weight of your trailer. Include the weight of water, additional accessories, clothing, food, and gear. To help customers purchasing a Coleman® Camping Trailer estimate this total weight, our Gross Vehicle Weight Ratings reflect the maximum weight of the trailer when fully loaded for camping. Be sure the weight of the tow vehicle plus the weight of your trailer do not exceed the Gross Combined Weight Rating of the tow vehicle.
3. Pay close attention to quality. When making your final selection, we are confident you will find that the quality of a Coleman® Camping Trailer is second to none. The closer you look, the better we look.

Taking these simple steps before you buy will help ensure that your trailer and tow vehicle combination is just what you wanted.

Happy Camping!

IMPORTANT-PLEASE READ: Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at: www.colemantrailers.com or contact your local Coleman® Camping Trailer dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. We have designed Coleman® Camping Trailers to provide a variety of uses for customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e.: occupants, equipment, fluids, cargo, etc.) to ensure that the vehicle's capacities are not exceeded.
