- The drive system is enclosed for protection from weather and road conditions.
- The underneath location of the system allows for easy inspection and maintenance. Grease zerks are located top and bottom of the main tube to allow yearly maintenance.
- A single cable capable of 3,200 lbs. tensile strength rotates around the rear cable pulley and pushes the four flexible steel push rods up the lifter posts.
- Flexible steel push rods.
- Four stage plated lift post.
- Lifetime warranty - see dealer for details.

Models shown on cover are 1203 and 1006D

## Crank-up Lift System
