Discover the Difference

Exterior Features

The Best Tent in the Industry

Our folding trailers have the strongest, heaviest, and most durable tent in the industry. Our exclusive CAVLAR-15 weighs a full 15 ounces per running yard and is constructed with a full 10 ounces of vinyl and 5 ounces of fabric. Most of the competition uses a 13 ounce tent with only 10 ounces of vinyl and fabric. Our tent material will not separate, crack, or peel and resists damaging UV rays and mold. It is designed for long-term wear. That's why we give it a 5 year warranty!

Laminate Vinyl vs. CAVLAR-15 The Real Story

Our exclusive CAVLAR-15 is superior to tent materials used by other manufacturers.

* Information based on "weight per running yard" and measured in ounces

Why a Thor Product Is Your Best RV Value:

Thor Industries, Inc., listed on the New York Stock Exchange, proudly traces its history back over seventy years to the pioneering days of the RV industry with the founding of Airstream, the industry's oldest and most renowned brand. Our total commitment to quality and our philosophy of putting our customers first has led to our continuous growth. Today, Thor is the largest builder of RVs. Thor's strong financial condition and years of solid growth are your assurance that we will be here to serve you for years to come. We think this extra peace of mind is important when you are making a significant investment. Because our customers are always #1 with us, we work harder than other manufacturers to satisfy you.

Your Local Dealer:

This brochure is printed on recycled paper as part of Thor's corporate effort to minimize waste and conserve our natural resources. Providing safe, fuel-efficient recreational vehicles is Thor's way of further demonstrating our role as the industry leader in safeguarding our nation's environment.

Vehicle Loading—Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry Weights based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options, and cargo. Liquid capacities and weights are approximations only.

Warning: This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing, and towing instructions.
