Vehicle loading- Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry weights based on standard features- Some optional equipment not included. Net carrying capacity (NCC) is determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options and cargo. Liquid capacities and weights are approximations only.

Warning- This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing and towing instructions.

The Industry's Best Warranty – By Far!

We're so confident in the design and construction of our products that they are covered by Thor's Limited Warranty.

Your warranty includes:

- One-year Bumper to Hitch Limited Warranty
- Two-year Structural and Appliance Limited Warranty
- and much more!

*see warranty statement for details.

This brochure is printed in part on recycled paper as part of Thor's corporate effort to minimize waste and conserve our natural resources. Providing safe, fuel-efficient recreational vehicles is Thor's way of further demonstrating our role as the industry leader in safeguarding our nation's environment.
