COACH, INC. FAMILY VALUE
Exclusive Features & Benefits

**SOLID HARDWOOD CABINETRY**

Our residential style cabinets are constructed of solid hardwood doors and fronts that are predrilled and screwed then they are stained and top coated with a furniture grade finish that provides long lasting beauty and durability as well as adding strength and quietness to your motorhome.

Other companies use wrapped cabinet fronts prone to peeling, fading and tearing. The softer composite wood used does not hold screws as well as hardwood resulting in loss of strength and squeaking. Discoloration will degrade the beauty and lower the value of the motorhome.

**Seamless Fiberglass Roof**

Excellent Weathering - Maintaining the vehicle's quality appearance enhances its resale value.

Tear Resistance - Flexroofs hard abuse resistant finish resists tearing, a condition that can cause leaks and lead to expensive repair.

Low Maintenance - Road grime can easily be removed with normal cleaning maintenance. Rubber chalking due to solar breakdown of the roof surface is eliminated, preserving the original appearance and resale value of the vehicle.

Stain Resistance - Fiberglass Flexroof is designed to resist staining and maintain its quality appearance.

Structural Integrity - Unlike conventional EPDM rubber roof membranes, Flexroof is a structural component of the roof system.

Textured Fiberglass - Helps dissipate heat and prevents tree limbs from tearing or scratching your roof.

**Predrilled Hardwood Construction**

Comfort Plus furniture by Gulf Stream Coach features residential styling, solid construction, total comfort and a comprehensive warranty.

**Competitor's Cabinetry**

Take the time to compare... and you will see the exceptional value of a Gulf Stream Coach.

The Cradle of Strength super strength truss system is unmatched in the RV industry. The structural subfloor foundation begins by welding a network of integrated steel trusses to the chassis rail. Specifically designed to distribute and transfer the tremendous forces from the coach to the chassis rail, these trusses are individually tested to withstand 6,000 pounds each.

An all steel overhead structure installed above the cockpit brings strength and rigidity to the upper portion of the coach providing a safe strong platform to install a TV that will not break free in an impact while maximizing available storage.

FRED FACTS
The real advantages of Front Engine Diesel.

PERFORMANCE • Front Engine configuration uses natural motion and ram air to cool the engine allowing the valuable horsepower to concentrate on powering the coach, not cooling the engine.

EFFICIENCY • The Front Engine Diesel chassis touts a fuel economy of an estimated 12-13 MPG *

*actual mileage per gallon may vary due to road conditions, terrain, driver habits, cargo weight, or towing.

STABILITY • By moving the Engine to the front of the unit and by increasing the wheelbase by 20" we create a more comfortable ride. This also eliminates porpoising (the forward and aft rocking caused by the engine being placed in the rear of a unit with a smaller wheelbase) A more stable ride means less wear on the unit and on the driver.
