ERGONOMIC KITCHEN...
The Yellowstone offers abundant storage and kitchen work space to prepare your family's favorite meals. This unique kitchen features a large refrigerator, 3-burner range, convection microwave and dual basin sink. Corian™ (optional) counters and sink covers provide a durable and spacious food preparation area.

BATHROOM...
The wide open concept bathroom with residential one piece shower and surround delivers the extra space needed to get ready for the day ahead.

VALUE...
Gulf Stream believes in adding value to the coach by utilizing residential hardware, durable cloth decor, residential carpet and linoleum, and Gulf Stream's very own Comfort Plus Furniture found only in a Gulf Stream Coach.

The main living area of the Yellowstone also features a flat screen television, optional large hide-a-bed sofa, and spacious dinette which can be replaced with a free standing dinette table and chairs on select floor plans.

SPACIOUS BEDROOM...
Gulf Stream's living concept gives you more room to utilize throughout the day. You will have plenty of room to relax...shut the bedroom off from the rest of the coach for privacy, allowing you to read a good book, watch TV or just relax.

The Yellowstone offers a unique bunk bed configuration built into the slide room which offers optional flip down DVD player for each bunk.
Unlike traditional plywood and foam seating, Comfort Plus dinette seating features the strength of steel and the comfort of a sprung cushion. All Comfort Plus furniture by Gulf Stream Coach also features residential styling, solid construction, total comfort and a comprehensive warranty.

Gulf Stream offers true flush floor slide out rooms to give you more headroom in the slide and eliminates the step up into the slide room that you will experience in many of our competitors motorhomes.

The Cradle of Strength super strength truss system is unmatched in the RV industry. The structural subfloor foundation begins by welding a network of integrated steel trusses to the chassis rail. Specifically designed to distribute and transfer the tremendous forces from the coach to the chassis rail these trusses are individually tested to withstand 6,000 pounds each. An all steel overhead structure installed above the cockpit brings strength and rigidity to the upper portion of the coach providing a safe strong platform to install a TV that will not break free in an impact and maximizing overhead storage.
