The most durable construction begins with an exclusive fiberglass roof, vacuum bond laminated to give your home the best rigidity as well as increased insulative value.

There is plenty of exterior storage room for your travel needs as well. The sub-floor of the *Friendship* features steel construction with a combination of tubular steel and strong steel trusses. The basement storage compartments are formed of galvanized steel for superior strength and durability. Most of them are carpeted to protect your belongings and lighted for easy loading and unloading at night.
