Gulf Stream's exclusive sun room slideout, which is getting rave reviews from many RVers, is available on various floorplans ranging in length from 30 to 38 feet. First in the industry this innovative sun room gives you a wide range of sight from the curb side of the coach and opens up the coach to eliminate that boxed-in feeling that other motorhomes give you. Gulf Stream makes you feel at home by introducing other residential features like hardwood cabinetry, residential hardware, deluxe carpet, a flatscreen television or optional LCD with Gulf Stream’s own G-sound, residential lighting fixtures, large refrigerator with optional icemaker, and free standing dinette and recliner.

Meal preparation is a pleasure in the Sun Sport with plenty of large hardwood cabinets and drawers, generous counter space, 3-burner stove, 2-door 2-way refrigerator and convection microwave.

Three-Zone Living… Gulf Stream is bustling with enthusiasm as we usher in a new age of RV comfort. Our innovative Three-Zone living concept is revolutionary. This floor plan offers the opportunity to relax in privacy or entertain a large social gathering. The opposing 19 ft. slide outs open the coach to enormous proportions. Creating three individual zones, family/living room, a separate dining room/galley and private sleeping quarters with a King bed and an attached pass through bathroom accessible from the bedroom or dining room.
Spacious Bedrooms...

The bedrooms in select Sun Sport models feature Gulf Stream’s Two-Zone Living Concept. By adding a sitting area in the bedroom we have increased the amount of useful daytime living area by 30%. With this arrangement you have the ability to close off the bedroom area from the rest of the coach to give you privacy and the peace and quiet you deserve.

Many bedrooms also offer washer/dryer hookups for the optional washer/dryer appliance, an optional computer desk/vanity, flat screen television and more wardrobe storage than you would imagine.

Bathroom...

Sun Sport bathrooms have hardwood cabinets and durable laminate countertops providing all the storage and work-space needed to prepare for the day. The one piece shower features a skylight for maximum headroom and natural lighting.

Our residential style cabinets are constructed of solid hardwood doors and fronts that are predrilled and screwed then they are stained and top coated with a furniture grade finish that provides long lasting beauty and durability as well as adding strength and quietness to your motorhome.

Other companies use wrapped cabinet fronts prone to peeling, fading and tearing. The softer composite wood used does not hold screws as well as hardwood resulting in loss of strength and squeaking. Discoloration will degrade the beauty and lower the value of the motorhome.

Seamless, carpeted, galvanized steel storage compartments safely cradle your valuables. Rust protective paint and foam sealed for extended life and a quiet ride.

Sealed for extended life and a quiet ride.

Excellent Weathering -
Maintaining the vehicle’s quality appearance enhances its resale value.

Tear Resistance -
Flexroofs hard abuse resistant finish resists tearing, a condition that can cause leaks and lead to expensive repair.

Low Maintenance -
Road grime can easily be removed with normal cleaning maintenance. Rubber chalking due to solar breakdown of the roof surface is eliminated, preserving the original appearance and resale value of the vehicle.

Stain Resistance -
Fiberglass Flexroof is designed to resist staining and maintain its quality appearance.

Structural Integrity -
Unlike conventional EPDM rubber roof membranes, Flexroof is a structural component of the roof system.

Textured Fiberglass -
Helps dissipate heat and prevents tree limbs from tearing or scratching your roof.

The Cradle of Strength super strength truss system is unmatched in the RV industry. The structural subfloor foundation begins by welding a network of integrated steel trusses to the chassis rail. Specifically designed to distribute and transfer the tremendous forces from the coach to the chassis rail, these trusses are individually tested to withstand 6,000 pounds each. An all steel overhead structure installed above the cockpit brings strength and rigidity to the upper portion of the coach providing a safe strong platform to install a TV that will not break free in an impact while maximizing overhead storage.
