

INTRODUCING THE ALL NEW DOLPHIN

X-100

THE VAN OF TOMORROW IS HERE TODAY!

From the moment you slip behind the controls of the Dolphin X-100, you'll know that this is the van of the future. The Dolphin X-100 is a whole new concept in compact, fuel saving vehicles. It's your economy car during the week and a unique little RV on the weekend. Built in off road lights, a full lift up canopy rear door window, and a patented roof rack/

spoiler are just a few of the things that make this little package a definite trend setter. And if you choose to personalize your rig a little more, there's a few additional options also available. The futuristic styling probably got your interest, but the economy and price will make you really want to take a good hard look at what you're driving now.

Dolphin

DOLPHIN X-100

DOLPHIN BRINGS YOU A WHOLE NEW CONCEPT IN VANS

Because of the Dolphin X-100's revolutionary design concept, the Dolphin Camper Company has been granted a Design Patent No. 875629, Docket No. 39-72.
