# Dolphin's Light Weight Fifth Wheels

Dolphin's Lightweight 5th Wheel is designed for fuel economy while not sacrificing on comfort. Downsized and light in weight, the aerodynamic styling of this trailer adds to the fuel efficiency of the mini-pickup which pulls the unit.

From the first time you step into this engineering masterpiece, you'll be pleasantly surprised at the interior richness, spaciousness and ceiling height that you would normally associate with a large trailer.

Dolphin's Fifth Wheels are made with the same craftsmanship that have helped to make its Toyota Mini Motorhomes famous.
