

Las Brisas

The Affordable Dream

Finally—A Stylish New Motorhome With A Very, Very Attractive Price!

Las Brisas (Las-Bree-sas) is living proof that a handsome Class A is well within your reach. Yes, you can avoid the sticker shock of Pace Arrow and Winnebago. And there's no need to settle for a basic box on wheels.

The value you've been looking for is standard equipment on Las Brisas.

You'll see the difference with just one look. And you'll immediately know that Las Brisas is right for you. The sleek, smooth, aerodynamic fiberglass exterior and generous window areas invite you to take the road.

Inside this spacious Class A are all the amenities you want — a color-coordinated interior with attractive fabrics, a well-equipped galley, loads of storage space and a list of standard features you won't believe.

Here's the kind of quality and value you'd expect from the leader in innovative motorhomes. That's National RV, a company

with a long standing track record of pleasing people like you. Fact is, more than a quarter century of engineering and craftsmanship excellence go into each Las Brisas.

High standards and low cost definitely are compatible. A visit to your local dealer for a personal tour of Las Brisas will provide ample proof. Take a test drive, see how well she handles, and discover how easily you can become a satisfied owner.

To keep you happy down the road, National RV even has a 24 hour toll-free help line service. (See back cover.)

Why not see your dealer soon? You'll find a choice of four exciting models to assure a perfect fit with your travel plans.

You've waited long enough to live your dream. And now you're very close to realizing it...

Las Brisas

Custom Decorator-Designed Interiors

incorporate rich, contemporary colors to welcome you to Las Brisas. These interiors are as spacious as they are inviting, contributing to your comfort both on the road and in your recreational setting.

Commanding views are guaranteed, both on and off the road. Las Brisas affords a panorama of the

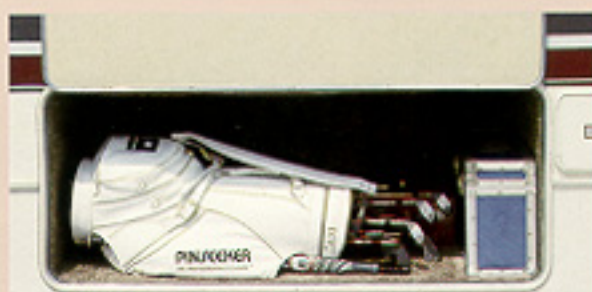

scenery through its large wrap-a-round windshield, and windows that surround the living area. The low-profile dash and engine cover also contribute to the feeling of spaciousness. And for your added convenience, the reclining bucket seats have the controls for the slide and swivel motions in the armrest. No more fumbling for hard-to-reach levers under the seat.

Other welcome touches include an exceptional

galley with plenty of storage. There is also a sofa that converts into a comfortable bed with a headboard. Between the double doors, some models feature space for a flush toilet, pleasant for plenty of room to move.

counter and storage space. That converts into a handy removable table in barrel chairs. All Las Brisas has two bathrooms with lavatory lighting, power vent, and more about.

Well-Equipped Galleys make meal preparation a breeze. You certainly won't want for cabinet or countertop space. The oak-trimmed countertop features a recessed double stainless steel sink with sink cover if you need the extra space. Top-quality appliances are fitted throughout. There's a built-in overhead microwave oven, a rattle-free, four-burner range top and a large double-door refrigerator that's sure to provide all the cold storage you could want. Additional nice touches include easy glide drawers, plus plenty of ventilation through slider windows and power exhaust fan.

Outside Storage easily accommodates large and bulky items, safely secured out of the way in a lockable trunk. With Las Brisas you have room to bring along virtually anything and everything you desire to make your travels more rewarding, more enjoyable.

Floor Plan Choices let you tailor your accommodations to your lifestyle, whether you prefer a 27' or 31' model.

Construction Features. Steel Roll Cage Construction with Steel Structure in Floor, Sidewalls and Ceiling. Laminated Sidewalls with Solid Block Foam Insulation and Fiberglass Exterior Skin. One-Piece, Aerodynamically Designed Front and Rear Caps With Continental Spare Tire Enclosure. One-Piece, Molded Fiberglass Roof Cap.

A One-Piece Molded Fiberglass roof Cap fits down snugly over the outer sidewalls and rear cap to eliminate leakage and facilitate drainage. This method of roof construction is far superior and more expensive to manufacture than that of our competitors.

Many motorhome manufacturers claim to have 'fiberglass roof construction'. However, don't be fooled. There's a big difference in construction methods. For example, some of our competitors' roofs are a thin sheet of fiberglass that comes off a roll and is attached with 50-60 screws down each side that could still allow for leakage. In addition, our one-piece molded fiberglass roof cap is 4 times thicker than the competitors and therefore much stronger. (Optional roof rack and access ladder shown.)

Twin beds are standard on models 275 and 315. Between the beds is a night stand with storage below and a mirror above. All models have windows at the head and side of the bed to provide excellent ventilation. And for privacy and light control, windows are fitted with color-coordinated mini blinds and valances. (Model 274 has a double bed.)

Queen-Size Island Bed, standard on model 314, features walk-around design to simplify access and bed making. There are three closets and twin night stands with storage below.

Under-Bed Storage lets you pack the important extras that will make your travels much more enjoyable. (Model 314 only)

Models 274/314/315 (Top Photo) place the dinette (converts into bed) on the same side as the entry door for pleasurable campsite viewing. Relax in a cozy swivel chair as you enjoy the way large screened windows bring in plenty of light and ventilation. What a great feeling!
