Sunnybrook products feature

DynaLock®

Performance Engineered Flooring

The only structural plywood flooring system with a Lifetime Limited Warranty.

Formaldehyde FREE

Meets January 1, 2009 CARB emission standards.

Endura® Cabinet Doors

Structurally superior inside—Naturally beautiful outside...

Endura’s superior dimensional stability is achieved through the combining of today’s advanced manufacturing technology and the timeless beauty of nature’s hardwood. The result is a cabinet door WARRANTED for TEN YEARS against warping, cupping or splitting, that endures long-term exposure to the extreme changes of temperature and humidity encountered by RV’s season after season.

This state-of-the-art manufacturing process has been adopted by many of America’s leading manufacturers, and with good reason:

- The beautiful look of a “natural” door panel greatly enhances visual aesthetics
- Today’s advanced technology delivers a product that surpasses traditionally manufactured door panels, but still delivers all of the charm and character
- By selecting “Endura” cabinet doors you are practicing environmentally responsible and stewardship, because our products are “green certified”
- This product is made of 100% wood solids

“Endura” Cabinet Doors are a product of Genesis Products, Inc., Hardwoods, Geoloque, Indiana
