IT STARTS WITH A SOLID FOUNDATION

RUV

RECREATIONAL UTILITY VEHICLE

A IFS

Independent Front Suspension provides a superior ride due to the ability of each wheel to address the road undisturbed by activities of the other wheels on the vehicle.

B FLAT CAB FLOOR

Entering and exiting the cockpit area is smooth and seamless. The forward placement of the engine eliminates the inconvenient step-up you find in other motorhomes.

C LOWER CENTER OF GRAVITY

Helps increase the handling and drivability of the motorhome, making the ride feel more connected to the road.

D EXTRA-WIDE FRAME RAILS

Durable, heavy-duty frame rails reduce flex, bowing and vibration to minimize coach stress and lessen noise.
