Bounder Diesel 2000: Pushing the competition to the limit.

For most diesel motor home enthusiasts there’s one pre-purchase consideration that takes top priority over every other: will my coach give me the kind of performance and economy I want and need? If the coach is the new Bounder Diesel, then in a word, yes. We’ll stake our name and the Bounder reputation for fun, function, and value on it. With all the power and reliability provided by a 275-HP Cummins® diesel engine and the overwhelming choice of nearly 90% of all diesel RV owners, this Bounder was built to run with the best of the diesel pusher market. Our designers and technical engineers anticipated the kind of use you have in mind for your Bounder Diesel and just how high your expectations are. So they created an exceptionally functional motor home that was built to be used and enjoyed—in every way, all across this country, and in just about any weather condition you’ll encounter. Bounder Diesel is ready to “push” ahead full time. Are you?

Product information and photography included in this brochure were as accurate as possible at the time of publication. For the most current product information and changes, please visit our Website at www.fleetwood.com or contact your local Fleetwood dealer. Subsequent refinements may be evident in the actual product. Prices and specifications are subject to change without notice. All fuel and liquid capacities are approximate and dimensions are nominal. Fleetwood has designed its motor home brands to provide a variety of potential uses for its customers. Each unit features the optimum storage, fluid, seating and sleeping capabilities. Though the customer enjoys this potential, he/she also has the responsibility to select the proper combinations of loads without exceeding the chassis weight capacities.
The Power Platform II Makes The Difference

Bounder Diesel’s quality begins long before the features come on board. We begin by building on our exclusive Power Platform II, a unique truss design welded together using tubular steel that’s durable, strong, and dependable. The result is a quiet and nearly flawless ride, increased floor strength, and substantially more storage space below. An all-steel foundation further reduces stress loads on the sidewalls and minimizes chassis flex on uneven roads.

### Exterior Features for the 2000 Bounder Diesel

Bounder Diesel not only has everything Bounder has in terms of practical form and function, but can also boast the performance and economical benefits of a 275-HP Cummins® diesel engine. Add a full fiberglass front cap and bumper similar to our other coaches and you’re looking at the motor home that’s a Bounder enthusiast’s dream come true.

Bounder Diesel offers an all-new steel truss construction in its basement floor configuration that offers more pass-through storage on a foundation that is three times stronger than regular wood frames. And with Bounder Diesel’s domed roof, there is more interior head room, improved roof strength, and optimum insulation.

Bounder Diesel—providing performance, function, and a whole lot more.

Note: Tank manufacturer’s listed water capacity (wc). Actual filled LP capacity is 80% of listing due to safety shutoff required on tank.

1. GVWR (Gross Vehicle Weight Rating): Means the maximum permissible weight of this motor home. The GVWR is equal to or greater than the sum of the unloaded vehicle weight plus the net carrying capacity.
2. GAWR (Gross Axle Weight Rating): Means the maximum permissible loaded weight a specific axle is designed to carry.
3. Base Weight: Means the weight of the motor home without fuel, options, water, cargo, or passengers.
4. GCWR (Gross Combination Weight Rating): Means the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed trailer or towed vehicle. Towing and braking capacities may differ. Refer to Fleetwood and chassis manufacturer manuals for complete information.
This award certifies that Fleetwood has met Ford's rigid quality standards for modifying a Ford chassis.
