1. GVWR (Gross Vehicle Weight Rating): Means the maximum permissible loaded weight of the motor home. The GVWR is equal to or greater than the sum of the unloaded vehicle weight plus the net carrying capacity.
2. GAWR (Gross Axle Weight Rating): Means the maximum permissible loaded weight a specific axle is designed to carry.
3. Base Weight: Means the estimated weight of the motor home without fuel, options, water, cargo or passengers.
4. GCWR (Gross Combined Weight Rating): Means the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may differ. Refer to Fleetwood and chassis manufacturer manuals for complete information.
5. Length taken from front bumper to rear bumper (excludes accessories).
6. Excludes safety equipment and awnings.
7. Tank Manufacturer’s listed water capacity (WC). Actual LPG capacity is 80% of water listing as required by the safety code.

* The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing.
