**Tuff-Coat® Exterior Fiberglass Sidewalls** are Vacu-bonded® into a strong composite structure, as opposed to competitors’ thin fiberglass laminate.

**Dual A/C Units** Bounder has maximum cooling capabilities and plenty of storage because its A/C units are mounted on the roof and not in the basement.

**Tuff-Ply Roof** is UV resistant, durable, easy to clean, and doesn’t scratch like many competitors’ fiberglass or aluminum roofs.

**HOLDING TANKS** are enclosed between the upper and lower basement floors. This allows them to be heated to prevent freezing in cold weather.

**POWER PLATFORM CONSTRUCTION**
Fleetwood’s patented Power Platform begins with two 10-in. steel I-beams welded lengthwise to the chassis. From the beams, steel outriggers extend outward. Together, they create a basement for fluid tanks and storage while supporting the floor, walls and roof with a rigid metal frame. This complements the chassis to make it even stronger.
