THE FACTS BEHIND OUR MOTOR HOMES

Fleetwood uses automotive style bonding for all windshields. Most competitors still use old rubber gaskets.

Fleetwood uses 100% electric slide-outs. Some competitors still use high maintenance hydraulic systems.

Fleetwood Vacu-Bonds® all sidewalls, ceilings and floors. Some competitors only vacuum laminate on more expensive models.

Fleetwood uses either all aluminum or steel construction for floors, sidewalls and ceiling structural framing. Some competitors still use wood.

A. Steel I-beams are welded the length of the chassis for enormous weight-bearing ability.

B. Water tanks run horizontally down the center of the frame for balance.

C. Beefy steel outriggers firmly cradle all exterior compartments.
