*Sleeping capacity is a variable number and is affected by items such as size of occupant, options and floor plan. Some models are not available in all areas of the country. Please see your local dealer for model availability.

- = Exterior Storage
PIioneer Floor Plans

1. GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this trailer when fully loaded. It includes all weight at the trailer axle(s) and tongue or pin.
2. All dry weights are based on the standard model and do not include optional features or equipment.
3. Cargo Carrying Capacity is determined by subtracting Gross Dry Weight from GVWR. Cargo includes all fluids, optional features, equipment, and personal cargo.
4. Length measured from hitch or pin box to rear bumper (excludes accessories). Trailer length includes hitch; fifth wheel includes standard pin box.
5. Actual height may be lower, based on option offerings. Consult with your dealer to obtain actual height for the unit you are interested in.
6. Approximate.
7. Water weight equals 8.3 lbs per gallon. Propane weight equals 4.2 lbs per gallon.
8. Add 10" if equipped with optional spare tire and carrier.
9. Hitch weights are dependent upon how the trailer is equipped with options, on-board cargo and tank fluid levels. Actual hitch weights may be higher or lower than shown. It is recommended that the tow vehicle and hitch for your trailer have sufficient capacity to accommodate the GVWR of the trailer selected.

N/A = Not available at the time of printing.

IMPORTANT— PLEASE READ: Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at www.fleetwoodrv.com or contact your local Fleetwood dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. Fleetwood has designed its recreational vehicles to provide a variety of uses for customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e., equipment, fluids, cargo, etc.) to ensure that the vehicle's capacities are not exceeded.
## FEATURES

### STANDARD FEATURES
