**POWER PLATFORM CONSTRUCTION**

Fleetwood’s patented Power Platform begins with two 10-in. steel I-beams welded lengthwise to the chassis. From the beams, steel outriggers extend outward. Together, they create a basement for fluid tanks and storage while supporting the floor, walls and roof with a rigid metal frame. This complements the chassis to make it even stronger.

*Drawings are for illustrative purpose only to highlight aspects of motor home construction. Actual motor home design depends on model and is subject to change.*

**AN EXTERIOR AWNING** is standard and provides great protection from the weather, so you can enjoy your surroundings rain or shine.

**TUFF-PLY ROOF** is UV resistant, durable, easy to clean, and doesn’t scratch like many competitors’ fiberglass or aluminum roofs.

**TUFF-COAT® EXTERIOR FIBERGLASS SIDEWALLS** are Vacu-bonded® into a strong composite structure, as opposed to competitors’ thin fiberglass laminate.

**STORAGE COMPARTMENTS** are lighted and include single paddle latches, gas-lift strut supports, stainless-steel hinges and insulated aluminum doors.

**Platform design creates lots of storage area and supports the sturdy Vacu-Bonded® walls.**

**Holding tanks are enclosed between the upper and lower basement floors. This allows them to be heated to prevent freezing in cold weather.**

**THE REAR FUEL FILL** allows you to fill up no matter what side of the pump you’re on.

**Holding tanks are positioned in the bottom center of the platform to enhance vehicle stability.**

**THE DRIVER’S AREA** features an AM/FM radio with CD player, easy to read gauges, convenient map storage and cup holders.

**THE UTILITY COMPARTMENT** provides a central place to empty your holding tanks and includes a water sprayer for quick clean up. For your convenience the compartment is lighted and all components are clearly marked.

**EZ STORE COMPARTMENTS** allow for storage of oversized or bulky items and conveniently move with the slide-out for easy access to your gear.

**THE REAR VISION CAMERA** provides a live feed to the driver’s dash and one way audio to easily communicate while backing up.

**ONAN® 4.0 KW MICRO QUIET GENERATOR** runs very quietly compared to other generators (5.5 kW generator is shown above and is standard on the 33R & 34F).
