

BIG SKY 2004

Just when you thought the Montana fifth wheel couldn't get any better, we proudly offer to you... the Montana Big Sky.

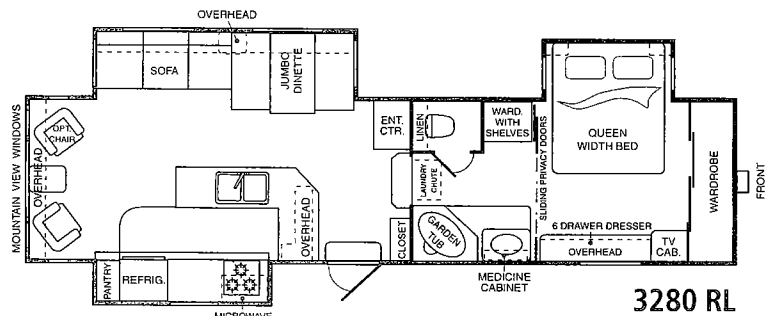

Big Sky, designed as one of the most luxurious fifth wheels available in North America today, takes Montana to new heights of comfort and overall beauty inside and out.

Upgraded furniture includes recliner-gliders and dinette chairs with extra-high backs for support and comfort along with premium-grade upholstery throughout. The drop-leaf dinette table allows you to entertain extra guests. In the kitchen, the most dramatic feature is the seamless, rounded-edge granite composite countertops with a one piece molded kitchen sink and pull-out sprayer faucet.

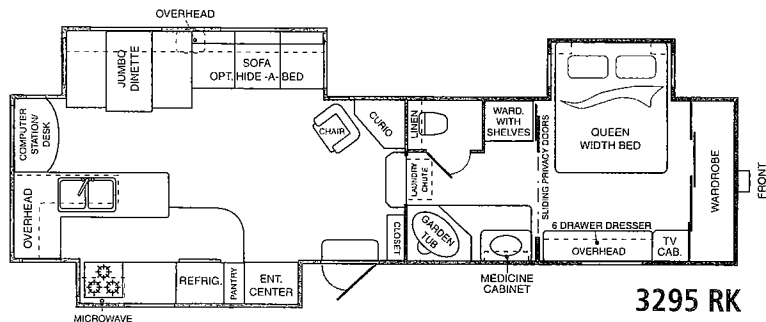

Premium lighting throughout the Big Sky is designed for flexibility of moods and includes touches like the bullet lights over the recliners and extra fluorescent lights in the kitchen and living room.

The large skyview window over the slideout room, leaded glass cabinet doors, real porcelain commodes and brass floor registers are but a few of the dozens of extraordinary details which move the Big Sky Montana into the realm of ultra-luxurious.

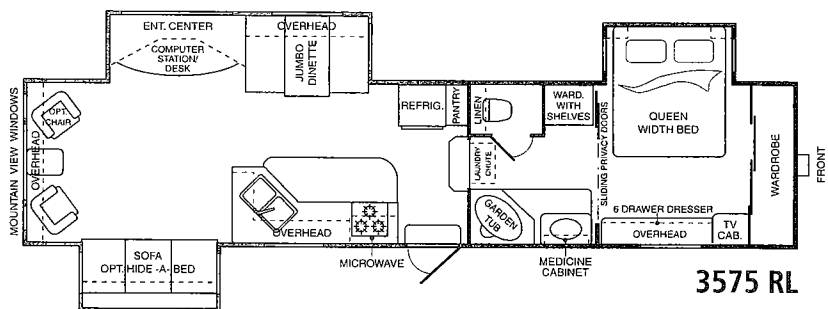

When you are ready for the finest fifth wheel you will ever own, there is only one choice... Big Sky by Montana.
