

The time has arrived.

A clear departure.

The motor home of the future is only weeks away. Evolutionary by design, revolutionary in performance, it will meet the needs of the times and become the motor home for the decade ahead.

Weighing thousands of pounds less than today's vehicles, it will squeeze an unexpected number of miles out of every gallon of gas.

In state-of-the-art engineering, aerodynamic styling, extreme efficiency of interior space, and stable, sure-footed handling, this anxiously awaited motor home will set the pace for an entire industry of followers.

And it will be called SPECTRUM®. Arriving soon from Itasca.

Spectrum by **Itasca**®

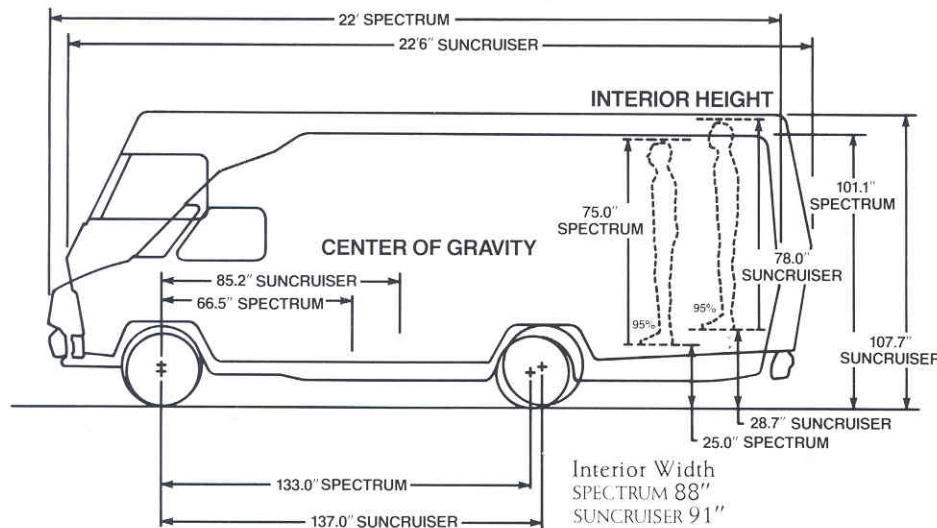

Arrive in the future. Spectrum.

To fully appreciate the innovative thinking behind the spectrum, compare it with the Itasca Suncruiser, an uncompromising motor home in its own right.

Spectrum will weigh a startling 40% less than Suncruiser, yet maintain the stable handling and

structural strength needed to conquer the rigorous ride and handling trials of the General Motors test track.

Spectrum is clearly a departure from the motor home of today, a welcome step into the future.

	SPECTRUM	SUNCRISEUR 22RB
Lavatory Cabinet	7.60 lbs.	23.56 lbs.
