Winnebago presents a motor home so advanced it sets the pace for an entire industry of followers.
Meet the most advanced motor home in America. The bold new Warrior™ by Winnebago. Warrior is a proud achievement in engineering. It sets remarkable new standards for fuel efficiency, maneuverability, livability and year round usability.

The most startling feature of this incredible new vehicle is the dramatic reduction in unnecessary weight. Space-age materials and innovative construction techniques have left Warrior 36% lighter than comparable vehicles.

Yet it's just as tough. Just as sturdy. And miles ahead in fuel economy.

Drag, too, has been cut to the bare minimum to maximize mileage. Warrior forms a wedge into the wind. Slicing through the air rather than pushing it in front of you. It has the look and the performance of a vehicle patterned for flight.

Not only is Warrior the most efficient motor home on the market. It's also the most responsive. Warrior is precisely balanced...
Not surprisingly, then, Warrior handles unlike any motor home you’ve ever driven. More like the family car.

But with the comfort and space of a full sized, fully furnished leisure home.

Step inside. Nothing this efficient has ever been this livable. Skilled interior designers have turned every inch of a Warrior into stretch out living room for 4 adults.

Unlike a van, Warrior gives you full, stand up headroom. A dry bath. The most efficient floorplan ever. A side entry door. Plus a well equipped galley complete with elbow room, totally washable materials, and the unmistakable mark of Winnebago quality.

Truly, Warrior is the vehicle you’ve waited for. Efficient enough to drive anywhere, anytime. Spacious and comfortable without compromise. And so innovative, it sets the pace for an entire industry of followers.

Warrior is destined to set a new pace, responsive to the needs of the 80’s.
WARRIOR. Miles ahead of anything else on the road.

Or protecting your investment with an optional 5 year/50,000 mile Traveler's Protection Plan. The best extended coverage in the industry.
Or leading the industry in resale value.
Or mounting the engine chassis on rubber to reduce squeaks, groans and road noise.
Or adding steel reinforcements at all critical points.

Or beating high gas prices by burning inexpensive liquid propane. Warrior's optional WinnAir™ Dual Fuel System with Landi-Hartog components is a proven performer.
Or making servicing so easy that even major work requires only minimal time. But being so dependable you will probably never need it.
Or meeting rigorous safety standards. Even when dropped upside down onto a concrete floor.

Clearly, Warrior sets the pace for an entire industry to follow. Not just because it's the most advanced motor home you can buy. But also because it's built to be a Winnebago. The number one motor home in America.

Winnebago
FOREST CITY, IOWA 50436

Warrior offers extra sleeping capacity in the optional Youth Bed. A pull down bunk is also available.
