

ITASCA SPIRIT

Just because a motor home is inexpensive doesn't mean it has to be cheap.

A case in point: The Itasca® Spirit® line, your chance to buy premium Itasca quality without paying a premium price.

Like all Itascas, the three Spirits (class A, class C, and micro) are built with welded steel construction and the most exhaustive product testing in the business. And Itasca offers the best resale value and dependability available.

All three Spirits have everything you need for comfortable life on the road. They feature a fully-equipped galley, bathroom with shower, and enough sleeping room for up to five. Check out Spirit's quality and value—test drive one at your Itasca dealer soon!

CLASS A SPIRIT.

Early pioneers chose their gear carefully. They made the most of what they had. A rugged wagon with space for their belongings and the equipment they would need along the way.

Today, modern-day explorers find that same philosophy

in the Class A Spirit — with comfort and convenience added.

Class A Spirit is built like Itasca's larger, more expensive motor homes.

Thermo Panel® sidewalls and a laminated roof (with Itasca's unique locking-joint roof/wall construction) cover Spirit's rugged, welded steel structure.

Motor home design like this adds years of life and livability to each Spirit. Yet they still can cost thousands of dollars less than other Class A motor homes.

Spirit's attractive interior is outfitted with comfortable furniture and durable carpeting and fabrics. Lots of headroom in the spacious cab gives easy access to the living area. And its storage space lets you haul gear as if you had a herd of pack horses.

An Itasca through and through, with integrity built in from top to bottom, the Class A Spirit meets the toughest quality standards in the industry.

And best of all, it meets your budget as well.

The Class A Spirit gives you lots of exterior storage. Unlike some motor homes, a driver's door with roll-up window is optional.

The galley has an oven with a four-burner range-top, large refrigerator/freezer, double stainless steel sink, systems monitor panel, and an optional microwave.

Class A Spirit provides plenty of room to relax and loads of overhead storage. The optional front bunk provides extra sleeping space. Between the twin, swiveling side chairs is a convenient pull-out table.

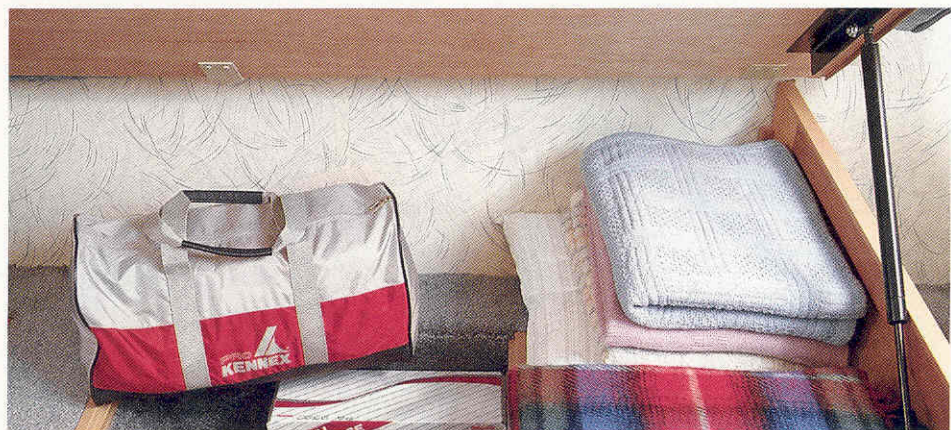

Luxurious furniture built by Winnebago Industries' craftsmen and durable stain-resistant carpet provide the comforts of home. The driver and passenger seats swivel to provide extra lounge seating. The optional vinyl

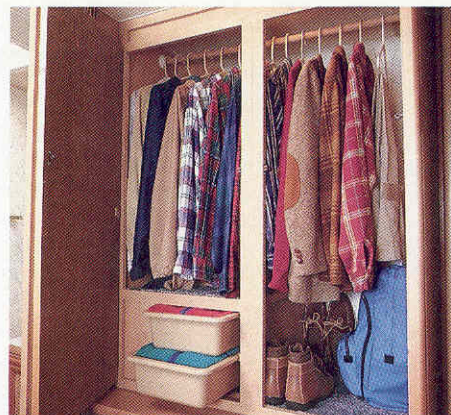

The 327RT model features outside access to the underbed storage area.

floor covering allows easy clean-ups in the galley.

The 27-foot model's unique underbed storage area is easily accessible from both inside and outside the motor home.

The spacious wardrobe offers plenty of room for full-length items. Handy drawers pack away small items.

The fully equipped Class A Spirit has a bathroom with shower, marine toilet, vanity, and plenty of storage.

The bedroom boasts extensive storage space, a color-coordinated mattress and window coverings, and a handy bedside nightstand.

CLASS C SPIRIT

It's done. You've planned the trip, plotted your course, and pointed yourself toward the horizon. Now let Spirit take you there.

Redesigned for 1990, the Class C Spirit has more storage, yet still offers the extra features and livability you expect to find in an Itasca motor home.

With room to sleep five, a fully-equipped galley and bathroom, and great value for your dollar, the Class C Spirit is a vacationer's dream machine.

The standard Class C Spirit has all the room, style and features you could want in a motor home. Plush carpeting, contemporary furniture and beautiful cabinetry add up to the best value Class C available.

The Class C Spirit: the motor home for dedicated horizon chasers. Sturdy Thermo Panel® walls provide outstanding insulation. New for 1990 is a straight roofline that adds extra head room and a cleaner look.

The fully-equipped cross-aisle bath, with shower, marine toilet, brass-tone fixtures, and vanity with new rectangular sink and color-coordinated faucet, gives you plenty of storage.

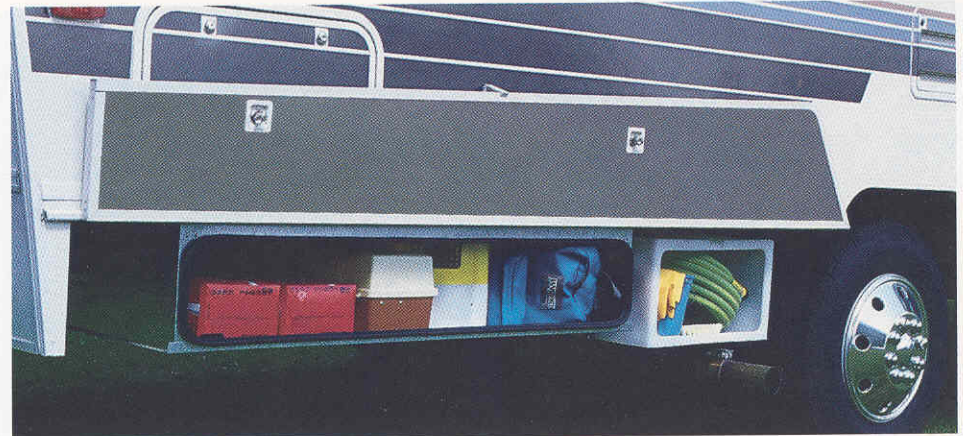

In the galley: stainless steel sink, systems monitor panel, four-burner rangetop with porcelain-door oven. A microwave oven and easy-maintenance vinyl flooring are optional.

Class C Spirit's bedroom offers generous storage and lots of windows for cross-ventilation, color-coordinated bed pillows, mattress cover(s) and attractive window coverings.

Spirit will always give you something to look forward to. In the cockpit, swivel/sliding seats, cruise control and in-dash air conditioning. Above, a queen-sized, cab-over bed with a panoramic view.

Also available, two optional storage compartments hidden behind a new full-length valance door. The compartment behind the rear wheel is made of seamless plastic for added protection.

The 327RT model features outside access to the underbed storage area.

The generator and a handy storage compartment are located on the driver's side of the 327RT.

The attractively finished rear end includes integrated tail lights, vinyl spare tire cover and optional roof rack and ladder. A bright rear bumper is included in the optional exterior package.

MICRO SPIRIT

The Micro Spirit is the least expensive Itasca. It's the perfect starter motor home for people looking for a weekend escape vehicle.

With a new V6 engine, standard this year, you'll have plenty of power for passing and climbing hills. The Micro Spirit offers the same quality construction, design, features and conveniences found in all Itasca motor homes. Compare prices and you'll agree, Micro Spirit is the best motor home value available.

The Micro Spirit has a roomy, open feel that belies its compact size.

The Micro Spirit's Thermo-Panel® walls provide outstanding insulation.

Note the attractive window coverings, spacious cab-over bunk, and generous overhead storage. The dinette easily converts to a bed.

The bathroom is fully equipped. It has a shower, marine toilet, sink, vanity, wardrobe, and medicine cabinet.

CONSTRUCTION CHART

EXTERIOR

- ☐ Galvanized Steel Storage Compartments
- ☐ Rotocast Plastic Rear Wheel Wells
- ☐ Windshield Mounted In Steel
- ☐ Tinted, Screened Windows

- ☐ Thermo Panel® Sidewalls Contain Thick Styrofoam® Insulation
- ☐ Every Spirit Is Subjected To An Extensive Water Leak Test
- ☐ Welded Steel Outriggers And Leveling Rails
- ☐ Locking-Joint Wall And Floor Construction
- ☐ Steel Cab And Dash Sub-structure
- ☐ Sealed Aluminum Underflooring
- ☐ Welded Steel Tube Wall Structure
- ☐ Seamless Water And Holding Tanks

CONSTRUCTION FEATURES

Simulating the ferocity of a thunderstorm, every Itasca motor home is subjected to an exterior water leak test in a tunnel filled with high-pressure spray nozzles.

Winnebago Industries' test track is one of a kind. In a half mile of track, a motor home endures cobblestones, chatter bumps, chuckholes, and a high-crowned intersection. Brakes are also tested on 20 and 30 percent grades.

To really put its motor homes to a test, Winnebago Industries drops them on their tops. Doors must still open and close easily. Appliances and cabinets must stay firmly in place. And the motor home must prove to be structurally sound in order to pass the drop test.
