

# ITASCA SUNFLYER

## Head of the class.

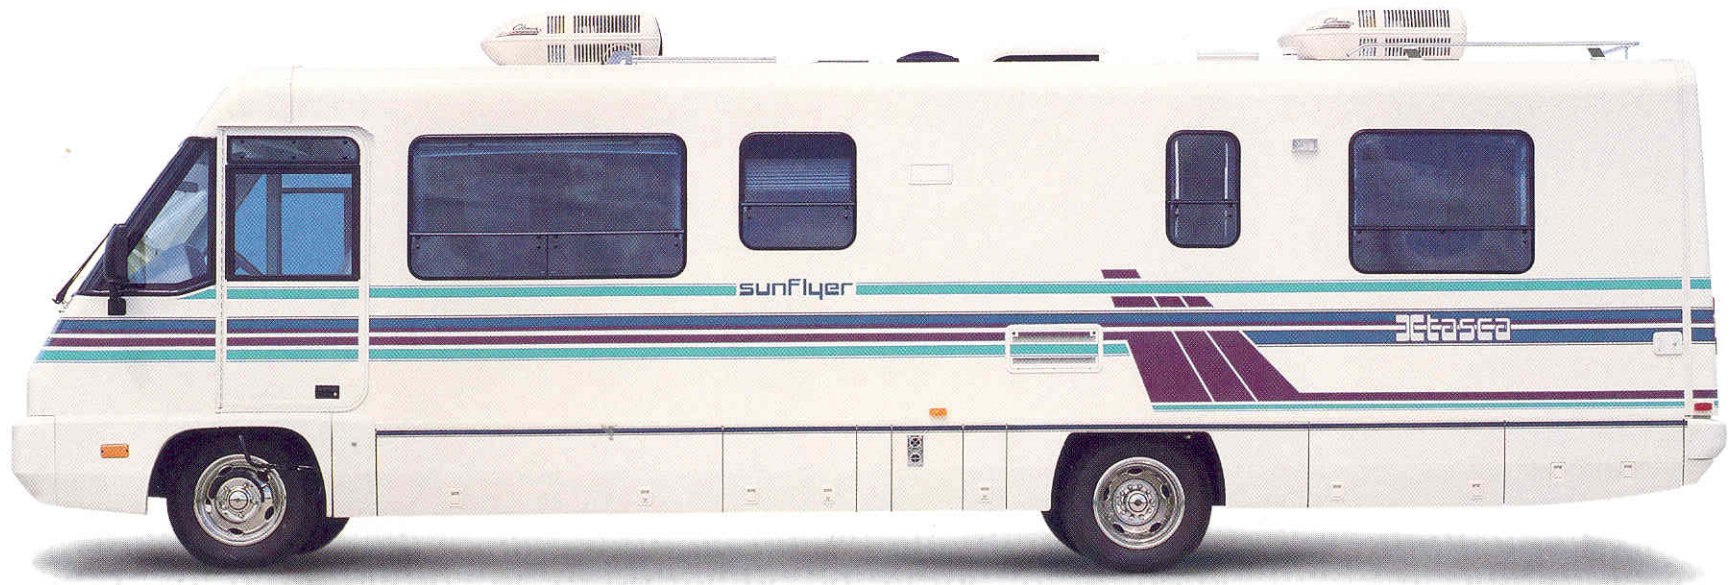

Say hello to Sunflyer® - the most popular Itasca motor home on the road today. Sunflyer's beautiful models score high marks

for their incredible amount of storage space, easy livability and superior handling. Add Winnebago Industries' legendary construction strength and impressive warranty package and you've got quite a motor home. The 1993 Sunflyer - it's not just the head of the class. It's the class of the class.

## Take a seat.

Or, if you prefer, relax on the couch instead. Wherever you find yourself, you'll notice the comfort and attention-to-detail that's gone into Sunflyer's well-planned interior. The custom-built furniture coordinates nicely with the rich, hand-crafted oak doored cabinets. Located at just the right height, these deep overhead cabinets offer plenty of easy-to-use storage space. The 1993 Sunflyer features a choice of two new interior decors, each beautifully complementing Sunflyer's high-grade carpet and window treatments. All fabrics and carpet are treated with Scotchgard™ Protector to ensure they stay show-room beautiful for years to come. Naturally, Sunflyer's exterior is just as stunning as the interior. Both models feature exciting new exterior graphics that enhance Sunflyer's already sleek appearance. And both models feature Winnebago Industries' smooth sidewall and backwall Thermo-panel® construction. This expert craftsmanship sits very well with experienced travelers. The best seats in the house await you at your nearest Itasca dealer.

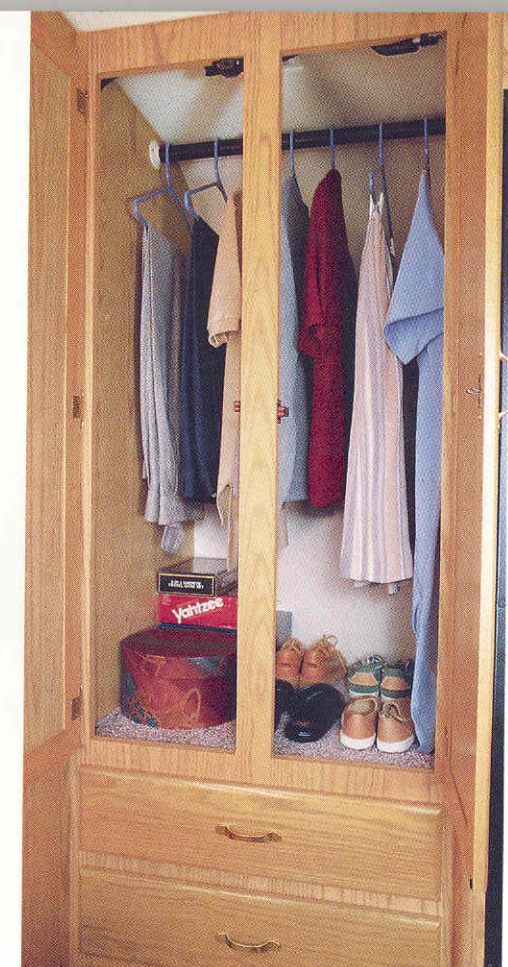

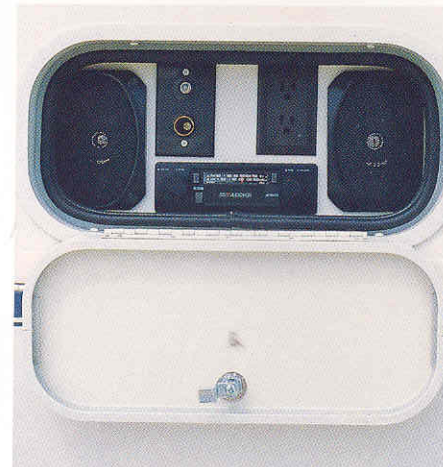

## Yawn.

Okay, we admit it. Our bedroom may put you to sleep. Fortunately, it was designed to. The elegant Sunflyer bedroom includes a comfortable Sealy® innerspring bed, reading lights, bedspread, pillows and pillow shams. Beautiful cabinetry provides plenty of storage. Our kitchen lets you cook the way you want to cook; with plenty of elbow room and the same features you'd expect at home. Like a double stainless sink with covers, three burner range with LP oven, microwave, and flush-mounted refrigerator/freezer. An Everpure® cold water purifier is attached to the galley's faucet, providing safe, great tasting drinking water. Optional parquet or vinyl kitchen flooring is a perfect finishing touch. Sunflyer's bathroom features a unique cross-aisle design for the most possible space. Standard features include glass-doored shower, skylight, roomy cabinetry, vanity and elegant, brass-tone accessories. As you can see, we've thought of everything. Including your yawns.

## Quite a package.

Sunflyer offers everything you'd ever want in a motor home. The Sunflyer's panoramic windshield is mounted in a full-steel support structure for unmatched durability and safety. The front entertainment center option makes it easy to bring your favorite movies and programs with you, and features a choice of a remote-control color TV or the TV with remote-control VCR and switching system. An optional 110V TV/VCR inverter permits use on the road. The chairs are designed to make long hours at the wheel pass effortlessly. And they both recline, swivel and slide. The driver's area is neatly designed with every switch and control within easy reach. The patio entertainment center is a popular option for outdoor entertainment. Features include AM/FM cassette stereo, two speakers, cable TV connection, and roof-mounted antenna with a convenient locking compartment. And there's plenty of storage space for all your clothes in the roomy wardrobe. These are just some of the special features that make Sunflyer such an impressive package. Rest assured, there are many, many more.

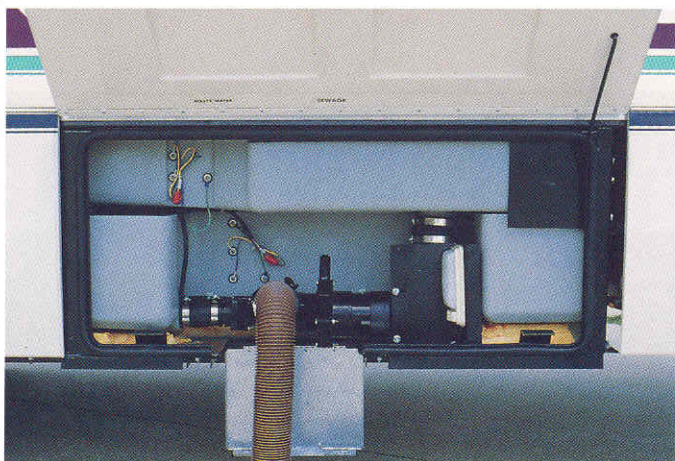

## Care to step outside?

Other high storage motor homes make it difficult to step outside. They're just not built with your comfort in mind. Fortunately, Sunflyer makes getting in and out simple with the extra wide side entrance and retractable electric steps. Additional standard features include a heavy duty screen door and convenient porch light. There's an abundance of stepwell storage, and a sturdy handle ensuring sure-footed entries. Drivers will appreciate Sunflyer's extra-wide driver's door. Additional features include the optional remote control, heated mirrors. Once outside, you'll notice the spacious exterior storage compartments. Each compartment features special weather resistant seals to guard against the elements and secure locks, ensuring your valuables stay where they belong. Optional pullout drawers make a nice addition to the storage compartments. A powerful generator can be added for use when electrical hook-up is not available. Obviously, features like extra-wide doors and electric steps are reasons it's so easy to get into a Sunflyer. The competitive price is another one.

## An inside look at the outside.

Sunflyer's exterior offers much more than plentiful storage compartments and a sleek, aerodynamic appearance. For starters, unlike the competition's rubber roofs, Sunflyer's crowned, single-piece fiberglass roof will not tear, puncture or suffer from heat degradation. It's even backed by Winnebago Industries' exclusive ten year limited warranty. Another Sunflyer standard is the exterior shower with its own water pump switch — perfect for quick and easy outdoor clean-ups. Sunflyer's heated, insulated holding tank compartment has storage space for the hose, a convenient valve height and a trap door allowing the hose to be hooked up with the door closed. Located in the single-piece fiberglass rear cap is a compartment with the electrical and TV hook-ups. Additional rear features include the high-strength ladder for easy roof access and the optional rear-view monitoring system for safe, effortless backing. And there you have it; an inside look at the incredible Sunflyer's one-of-a-kind exterior.

## Preferred Care

Unfortunately, situations happen. Among them - flat

tires and empty fuel tanks. That's precisely why Winnebago Industries' Preferred Care Program was created. The Preferred Care Program provides a special 24-hour toll-free roadside service network for the first year that you own your new Itasca motor home. This exceptional service is good throughout the U.S. and Canada and is staffed around the clock by experienced RV service professionals. Special services include dispatching emergency road service and towing, customer service assistance, and access to a network of over 20,000 prequalified service locations, including Winnebago Industries' dealers. After the first year of ownership has passed, the Preferred Care Program can be extended through the Winnebago-Itasca Traveler's (W.I.T.) Club.

## Customer First Warranty Plan

All 1993 Itasca motor homes are protected by the most comprehensive warranty package in the industry. Our standard warranty protects every vehicle for a full 12 months or 15,000 miles. In addition, each Itasca motor home is also protected by our Extended 36 Month/36,000 Mile Structural Warranty. This structural warranty covers sidewall and backwall Thermo-Panel® construction against delamination. It also warrants that exterior fiberglass panels used in the construction of the sidewalls, roof and backwall will remain free from surface fiber exposure, rust, rot and corrosion and will require no painting or refinishing (normal pigmentation change excepted) under normal conditions of use.

## Additional 10 Year Coverage

We're so sure of our craftsmanship and structural integrity that every 1993 Itasca motor home receives limited warranty coverage on roof and sidewall surface material for a full ten years from date of purchase to the original owner.

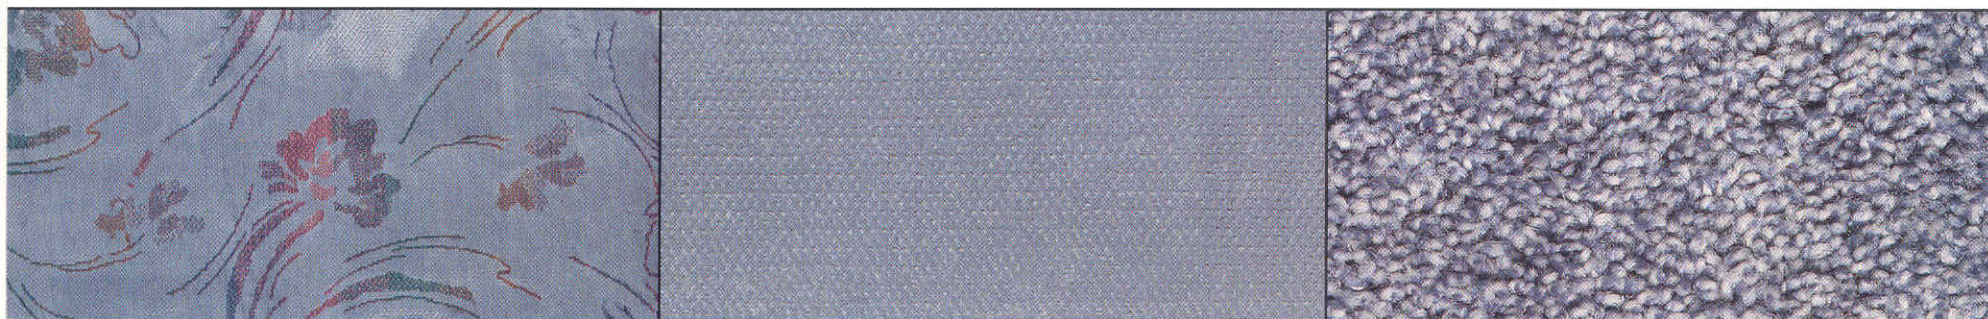

All 1993 Itasca motor homes are protected by the most comprehensive warranty package in the industry. Our standard

Not all standard features or options are available on all models. See your dealer for availability of specific options.

Winnebago Industries' continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice.

## It isn't easy.

In fact, building a better motor home takes a lot of hard work. For starters, Winnebago Industries thoroughly tests each motor home before it is added to the Itasca line. In the prototype stage, these rigid tests include the vibration test, salt-water spray test, weight distribution test and countless test track miles. Once in actual production, each motor home must pass a series of demanding quality-control tests. These rigorous tests are our way of ensuring the superior fit and finish Itasca motor homes are known for.

## Visit 60 full acres of Itasca.

We invite you to tour the Winnebago Industries factory in Forest City, Iowa. Every Itasca motor home is custom-built from the ground up at our factory, which is the largest in the industry. For more information about our free tour, call 515-582-3535.

## Winnebago-Itasca Travelers.

All Itasca owners are invited to join the W.I.T. (Winnebago-Itasca Travelers') Club. Members take part in rallies and caravans, receive exclusive discounts and services, and enjoy the company of others they meet on the road to the good life. For more information call 515-582-6874.

## Get out of the ordinary.
