

ADVANTAGE.

From the crisp, clean exterior design to the new, well-appointed

interior layouts, the 2002 Ultimate Advantage is everything a luxury motor coach should be.

This year's model lineup includes four unique floorplans. Each one incorporates dual-slideout rooms to maximize your living and bedroom space. If storage space is what you're looking for, you'll find it in the Ultimate Advantage. Its unique Ulti-Bay™ chassis offers large, accessible basement storage. And, because it is built in conjunction with Spartan™, you get unquestioned reliability and a smooth, powerful ride.

With all this, plus the finest amenities and Winnebago Industries' renowned craftsmanship, it's easy to see why the 2002 Ultimate Advantage is making waves in the luxury motor coach market.

▲ A leather love seat provides a cozy spot for two and is J-shaped for added comfort. Available on the 38K and 40J.

The cockpit places you in total command with an ergonomic dash that surrounds you with fingertip convenience. Standard upscale features include an electronic compass with exterior thermometer, Sony® stereo, built-in rearview monitor and roof-mounted air horns. Controls are sized and positioned for maximum comfort and usability. The innovative new SmartWheel is wrapped in soft leather and tilts and telescopes for perfect positioning. The windshield wiper, cruise, courtesy blink control and the headlight dimmer switches are incorporated into the steering wheel for easy access.

Luxurious Villa furniture is used throughout the coach, including the leather driver and passenger seats. Both seats feature electric, adjustable lumbar support and a 6-way power-assist seat pedestal for maximum comfort. The passenger area includes a convenient new slider window and a powered stepwell cover which provides flooring in front of the luxury lounge seat for comfort while traveling.

If you thought you needed an extra excuse to stay in and enjoy the exquisite surroundings, check out the entertainment choices. They include a 25" TV, stereo VCR, movie theater QSurround™ Sound, available DVD player, and an available digital satellite dish with manual or power controls. You can even watch a show and operate selected 110 volt AC appliances when you're not connected to shoreline or generator power, thanks to the standard 1500 watt inverter.

Take comfort in always knowing where you are and where you're going. An Alpine® Global Positioning System pinpoints your precise location and is available on every model.

Creating a sumptuous feast or a quick snack is easy with the well-equipped galley. Upscale features include a microwave/convection oven, Corian® solid-surface countertops and even an available dishwasher. A large, wood-framed fluorescent ceiling light is positioned to help illuminate the galley area.

The molded, Swanstone™ solid-surface sink is stain resistant for easy clean-up and its double bowl accommodates larger items. The single-control Moen® faucet features a spigot that can be pulled out and used as a sprayer. A separate Everpure® faucet provides purified drinking water.

Customize your galley with two refrigerator options. A large, doubledoor refrigerator/freezer comes standard. It includes a slideout side pantry for additional dry goods storage. You can also choose a 4-door refrigerator/freezer (shown here) if you prefer to keep more cold and frozen foods on hand. Both models include a standard icemaker.

Storage space is plentiful with beautiful cabinetry throughout the coach. It comes in Portsmouth Oak woodgrain or is also available in Salem Cherry woodgrain. Drawers feature dovetail construction while a catalyzed protective topcoat process provides a highly durable, luxurious satin finish typically found in exclusive home cabinetry.

- **1.** It starts as a plush couch.
- 2. Touch the button and it becomes a relaxing recliner with pullout ottoman.
- **3.** Touch the button again and it's a 60" x 75" bed. For added style and comfort, Rest Easy is available in fabric or leather.

The dining table provides a spacious eating area and easily expands to accommodate four place settings when entertaining guests. For added flexibility, choose the available multifunction dining/computer table. It doubles as a comfortable setting for writing letters or studying a travel guide and is well suited for a computer.

TRUE

Precision climate control is assured thanks to Winnebago Industries' exclusive TrueAir

Residential Central Air Conditioning. TrueAir utilizes superior cooling technology to supply optimum environmental control throughout the coach. At the heart of the system is a Coleman®-Mach® cooling-unit located in the basement to provide a lower vehicle profile while reducing noise and eliminating condensation runoff. You'll also find this location is much easier to service and provides a lower center of gravity than traditional roof-mounted air conditioning units. With the available heat pump, TrueAir can even help keep your Advantage warm on cool days.

A walk-through design creates a spacious bathroom with a private toilet area. Added conveniences include a residential-height porcelain toilet, ceramic tile floorcovering, solid surface sink(s) with brass fixtures and a flexible showerhead with single-handle controls.

The standard rear slideout opens wide to create a magnificent bedroom with a full-size, walk-around queen bed with Serta® innerspring mattress. Stretch and relax while watching the 19" color TV or drift off to sleep listening to the available rear stereo. For your storage needs, a spacious cedar-lined wardrobe with large drawers is provided, along with underbed storage.

The available keyed security vault has its own concealed location. It provides a safe place to keep important documents and valuables.

The available, built-in central vacuum cleaner features a powered brush head and a full compliment of accessories. A 30' detachable hose lets you easily reach the entire coach.

Launder your clothes at your convenience with the available, built-in combination washer/dryer. It includes nine wash and three time and temperature programmed cycles to accommodate a wide variety of fabrics and garments.

Portsmouth Oak Woodgrain

Salem Cherry Woodgrain

Camel

A keyless entry remote locks and unlocks the entry and compartment doors. The KeyOne™ system also allows these doors to be opened with a single, double-bitted key.

Electronic remote control mirrors feature large flat and convex surfaces and are strategically positioned to provide increased visibility and safety. Electric defrost helps keep mirrors clear.

A 10,000 pound draw bar capacity trailer hitch is standard to accommodate towing needs.+

The available, powered Carefree® One-Touch™ patio awning extends and retracts at the touch of a button.

Use the automatic leveling feature for fast, convenient set-up when you've stopped for the day. HWH® leveling jacks provide over 20 tons of hydraulic power for rocksolid stabilization.

Major plumbing connections and service functions are well-positioned and clearly labeled for ease of operation. Tank and system levels can also be checked at the convenient exterior monitor panel. A handheld shower, soap dispenser and paper towels are at hand for quick clean-ups.

The new, customized full-width rear mudguard helps deflect dust and small stones from the undercarriage and helps keep the coach and tow vehicle clean.

A standard 6,500 watt Onan® Marquis Gold™ (shown here) or available 7,000 watt Onan Quiet Diesel™ generator provides plenty of AC power. For added convenience, the generator slides out for easy servicing.

Access stowed gear even more easily with the available slideout compartment tray.

Michelin® XZA2 tires are mounted on precision-machined, polished aluminum wheels.

The air suspension system utilizes a single, large air bag over each wheel which provides improved suspension and ride characteristics over less advanced multi-bag systems. Each air spring is placed in a wide-track stance just inside the rear wheel. This position improves stability and helps protect the air springs from road debris that could be kicked up by the tires.

Some luxury motor coaches still use straight axle technology that is reminiscent of heavy trucks. But the Advantage includes an advanced independent front suspension that provides greater lateral stability, eliminates bump steer and allows each tire to move independently through its range of motion. As a result, each tire maintains better contact with the road for a smooth ride similar to that of a luxury sedan.

The 24 valve, 350 hp ISC 8.3L Cummins* diesel engine is equipped with a waste-gated turbo charger for improved power and efficiency. A four-point mounting system cradles the engine, isolating the coach from torque-induced vibration and noise. As an added bonus, basic service intervals for oil and filter changes are recommended at 15,000-air intake miles or 12-months under normal conditions, which reduces routine maintenance costs.

A great engine deserves a great transmission and that's exactly what you'll find in the Allison® 3000 MH. This six-speed transmission features adaptive electronic technology that actually enables it to adjust the shifting pattern based on your driving style. This creates smoother shifts between

gears and, best of all, improved mileage.

The Advantage features an ultra-wide wheel track for better handling and increased stability.

Fiberglass Roof

Ultimate Advantage features a one-piece fiberglass roof backed with a 10-year limited parts and labor warranty. Fiberglass offers superior strength, attractiveness and durability over rubber roofs found on many competitive models. Over time, rubber roofs are susceptible to chalking, streaking, and degradation, and have less puncture and tear resistance than fiberglass.

Air Intake

The engine air intake is positioned high on the sidewall to prevent road grime and debris from entering the engine air supply. This prolongs filter life and increases engine performance.

Air-line System Draining

Draining air-line system condensation is recommended on all vehicles that utilize air brakes and air suspension. Ultimate Advantage utilizes automatic system dryers and heated air system drains that incorporate remote lanyard controls that eliminate the need to crawl under the chassis to perform this routine maintenance.

Side Mounted Radiator

The radiator is mounted on the side of the coach for improved airflow and cooling.

The StoreMore Slideout System features the strength and rugged durability of hydraulic power. StoreMore exterior compartments are roomy, well-lit and sized to accommodate large and odd-shaped items. Best of all, they extend with the front slideroom for easy access to your gear. You'll also appreciate the one-handed operation made possible by the single-paddle latches and gas struts.

Full anti-lock air brakes provide impressive stopping power. The treadle foot brake pedal is mounted solidly to the steel cab deck to provide maximum brake pedal feel and control. Ulti-Bay is Winnebago Industries' exclusive monocoque chassis design that provides abundant mid-coach storage, impressive driving and handling performance, as well as 10,000 pounds of towing capacity.+

THE ULTIMATE IN STORAGE DESIGN

Ulti-Bay combines front and rear Spartan® Custom Chassis elements with an advanced truss design that eliminates bulky, cumbersome center rails. To provide even more mid-coach storage, large components such as the water heater, furnace and holding tanks are located fore and aft of the mid-section to create large, unobstructed storage bays.

In addition to the abundant storage, you'll appreciate the difference that independent front suspension and a wide-track stance make in creating a truly distinctive luxury motor coach driving experience. Ulti-Bay is everything a luxury chassis

by other factors such as the weight of the vehicle as loaded and the type of towing to be performed. Check with your Ultimate Advantage dealer for additional towing specifications.

The OnePlace® Systems Center places important and frequently used switches, gauges, levels and controls in one convenient location so you can easily check them at a glance.

POWER INE MANAGEMENT SYSTEM

Keep your electrical system running smoothly even when operating your central air conditioning on 30 amp shore power. The PowerLine® Energy Management System monitors onboard 110 volt electrical usage and minimizes the nuisance of tripped

campground circuits by regulating the operation of postponable electrical loads during periods of heavy usage. As demand is lowered, PowerLine automatically returns power to the secondary appliances and systems.

COMMITTED TO SERVICE. We back our motor coaches with the best service after the sale in the industry.

- 12-month/15,000-mile basic limited warranty
- RIPSaver 36-month/36,000-mile warranty on structure
 - Standard 10-year limited parts and labor roof warranty
 - Complimentary 24-hour roadside assistance program
 - TripSaver emergency warranty parts shipments
 - Nationwide Winnebago Industries dealer service network
 - 24-month/50,000-mile basic warranty on Spartan Custom Chassis
 - Nationwide Spartan Custom Chassis service network

RECOGNIZED OUALITY.

Recreation Vehicle Dealer Association members annually rate RV manufacturers on the

quality of their products, sales and service support. Winnebago Industries has achieved the coveted Quality Circle award every year since its inception, the only major manufacturer to do so.

All MOTOR COACHES ARE NOT CREATED EQUAL. Learn more about what sets Winnebago Industries apart. Ask your dealer for this guide. It will help you learn what makes Winnebago

Industries motor coaches distinctly superior to other brands.

Itasca Travelers (WIT) is a club for owners of Winnebago Industries motor coaches. WIT is a great way to meet people and offers you:

12-month/15,000-mile basic warranty, 36-month/36,000-mile warranty on structure,** 10-year limited parts & labor warranty on roof	S	S	S	S

- The height of each model is based on the curb weight of a typically equipped unit on the standard chassis. The actual height of your vehicle may vary by as much as 2" depending on chassis or equipment variations.
- Ultimate Advantage floorplans feature a wide-body design over 96". In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- Your motor coach's load capacity is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motor coach.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- S Standard
- O Optional
- * Not all items available in combination. See dealer for details.
- Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR and GCWR as well as adequate trailer brakes. Please refer to your vehicle's operator's manual for further towing information.
- NA Not available
- ** See your dealer for complete warranty information.

Winnebago Industries' continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice. Comparisons to other motor coaches are based on the most recent information available.

2002 ULTIMATE ADVANTAGE FLOORPLANS
