

As the proud flagship of Winnebago Industries, the 2002 Ultimate Freedom brings

an unsurpassed level of feature innovation, design and construction quality, and manufacturer support to luxury motor coaching. This year we're upping the ante with redesigned floorplans that include double sliderooms for a more spacious and comfortable motor coach experience.

It all starts with a commitment to excellence from engineering teams that have helped redefine the standard of luxury performance. This includes the creation of Winnebago Industries' exclusive Ulti-Bay chassis. Its unique monocoque design offers impressive driving and handling characteristics and expansive, easily accessible exterior storage.

Every Ultimate Freedom is constructed with the finest materials and a meticulous attention to detail at our brand new manufacturing complex dedicated exclusively to luxury motor coach production. From start to finish and top to bottom, Ultimate Freedom is the new standard in luxury performance. Take a test drive and experience the Ultimate Freedom for yourself. Once you do, you'll wonder how anyone could settle for anything less.

Have a seat in the luxury Villa lounge chair and you may never want to get up. It's covered in soft leather and, if you choose, add the available multi-purpose features including a powered footrest and remote controlled heat and massage to find yourself in a state of total relaxation.

designed and positioned to provide optimal illumination. Beneath you, you'll find plush, custom-designed sculptured carpet in the lounge and bedroom areas and fine imported Italian ceramic tile throughout the galley and bath areas which adds an exquisite, high-end touch.

The leather Villa luxury lounge passenger seat incorporates upscale features like a wider seat base, integrated seat belt, 8-way power assist and a reclining back for added comfort. A powered stepwell cover creates a flat cab floor when traveling and the seat also pivots for added seating when entertaining guests.

No slouch in the fun department, Ultimate Freedom is fully-loaded with entertainment features like a 27" stereo TV, stereo VCR, DVD player, video selection system, 10-disc CD changer, and a Sony Dolby 5-channel surround sound system with Sony speakers for unsurpassed audio clarity. If that's not enough, you can expand your options with the available digital satellite system. A 2000 watt Heart Interface inverter lets you keep the entertainment going even when shoreline power is unavailable.

to surround you in driving comfort with switches and controls that are ergonomically positioned and sized for ease of operation. You'll enjoy a driving experience that fits you perfectly thanks to an 8-way power seat and the innovative new Smart Wheel. This unique steering wheel is wrapped in leather and mounted on a steering column that tilts and telescopes for perfect positioning. Fingertip controls for headlights, windshield wipers and cruise control are incorporated into the wheel for driver safety and convenience. Choose the available Alpine® GPS/Mapping System and you can plan your route and stay on course anywhere in the country.

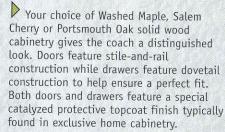

Whether you're in the mood for a quick snack, a light lunch or a gourmet meal, you're ready with this fullyequipped galley. The angled Corian® galley countertop and optimallysized cabinets maximize your work and storage space. Appliances include a G.E. 30" touch control microwave/convection oven or the newly available G.E. Advantium™ microwave/speedcook oven, a recessed, dual sealed-burner range top and an available dishwasher.

The 4-door Norcold® refrigerator/freezer has plenty of space for food and includes an icemaker for added convenience. An exterior basement-mounted, auxiliary refrigerator/freezer provides additional cold storage.

The double-bowl
Swanstone™ sink easily
accommodates larger
dishes and features a
Moen® single-control
faucet with pull-out
sprayer and an additional
spout for Everpure®
purified water.

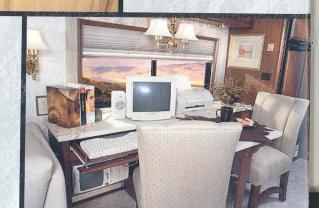

The Rest Easy® Multi-Position Lounge offers unmatched seating flexibility and comfort.

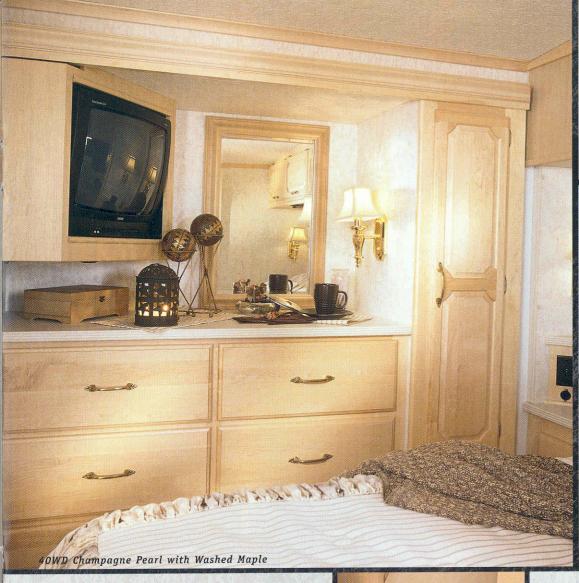

- 1. It starts as a plush couch.
- 2. Touch the button and it becomes a relaxing recliner with a pull-out ottoman.
- **3.** Touch the button again and it's a comfortable 75" x 60" bed. Choose the available leather upgrade shown here and enjoy the added features of dual recliners with a single pull-out ottoman, as well as dual remote-controlled heat and massage features.

Enjoy a quiet dinner for two or entertain dinner guests. The dining table features a Corian top and easily expands to seat four.

If you use a computer when traveling, you may prefer the available dining/computer table. It's designed to function as a convenient workspace, as well as a pleasant dining area.

You'll feel like royalty with the luxurious appointments in the bathroom. They include a Moen brass faucet, two Corian oval sinks, porcelain toilet, available gardenstyle shower/tub, single-control faucet with flexible showerhead and much more.

Precision climate control is assured thanks to Winnebago Industries' exclusive TrueAir®

Residential Central Air Conditioning. TrueAir utilizes superior cooling technology to supply optimum environmental control throughout the coach. At the heart of the system is a Coleman®-Mach® cooling-unit located in the basement to provide a lower vehicle profile while reducing noise and eliminating condensation runoff. You'll also find this location is much easier to service and provides a lower center of gravity than traditional roof-mounted air conditioning units. With the available heat pump, TrueAir can even help keep your Freedom warm on cool days.

A cedar-lined, walk-in closet is standard on the 40WD. It offers abundant space for hanging clothes and even includes a shelf at floor level for organizing shoes.

The standard rear slideout creates an incredibly spacious bedroom. But perhaps what is more impressive is the storage supplied by the large chest of drawers and the cedar-lined, walk-in closet or the wardrobe. Beautiful wood cabinetry provides even more convenient storage space while decorative wainscoting adds a touch of elegance. Relax to the sights and sounds of the 19" TV or available stereo as you drift off to a peaceful night's rest on the walk-around, queen-size bed with Serta[®] innerspring pillow-top Perfect Sleeper™ mattress.

Enjoy added peace of mind when you secure your valuables and important documents in the available hidden security vault.

Spills can happen. When they do, you'll appreciate the central vacuum system. It comes with a full complement of accessories and a 30' hose that can reach virtually any area of the coach interior.

No need for a laundromat with the available combination washer/dryer. It features multiple wash, time and temperature cycles to accommodate a wide variety of fabrics and tucks away behind decorative louvered wooden doors when not in use.

Timber Ridge

The remote keyless entry lets you unlock the cab door from up to 40 feet away while the KeyOne™ system lets you operate most doors with a single, double-bitted key.

The large, top-mounted exterior mirrors include both flat and convex surfaces and are positioned to reduce road vibrations and give you a full view of the road. Electric defrost keeps the mirrors free from snow and ice during the winter months.

The standard trailer hitch has an impressive 10,000 pound towing capacity.*

You can't help but relax when sitting in the shade beneath this Carefree® One-Touch™ patio awning. It automatically extends and retracts with the touch of a button.

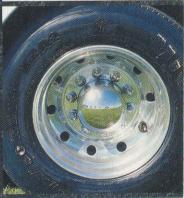

Automatically place your coach on an even plane when you're stopped for the day. Four HWH® leveling jacks provide over 20 tons of hydraulic leveling power.

Major plumbing connections and service functions are well-positioned and clearly labeled for ease of operation. Tank and system levels can also be checked at the convenient exterior monitor panel. A handheld shower, soap dispenser and paper towels are at hand for quick clean-ups.

The new, customized full-width rear mudguard helps deflect dust and small stones from the undercarriage and helps keep the coach and tow vehicle clean.

The standard 7,500 watt Onan® Quiet Diesel® generator delivers plenty of power for running multiple AC systems.

It slides in and out on pneumatic powered slides for easy servicing.

A sturdy storage tray slides smoothly in and out to make storage more accessible.

The Ultimate Freedom looks great from top to bottom. This includes the aluminum wheels that are machinepolished to stand out in a crowd.

The air suspension system utilizes a single, large air bag inboard of each wheel assembly which provides improved suspension and ride characteristics over less advanced multi-bag systems. Air springs are placed in a wide-track stance just inside the wheels. This position improves stability and helps protect the air springs from road debris that could be kicked up by the tires.

The independent front suspension (IFS) on the Freedom can make any road seem like a newly paved highway. Some luxury coaches still use straight axle technology that transfers road forces from wheel to wheel — reminiscent of heavy trucks. IFS, however, provides greater lateral stability, eliminates bump steer and lets each wheel move independently through its range of motion. Each tire maintains better contact with the road and you get a smooth ride comparable to that of a luxury sedan.

Freedom is powered by a proven Cummins® 370 hp ISL 8.9L turbo diesel engine. It features turbo-charging, aftercooling and electronic engine controls for plenty of diesel pusher torque and power. The standard engine exhaust brake utilizes engine exhaust to help slow the vehicle in braking situations, promoting less brake pad wear.

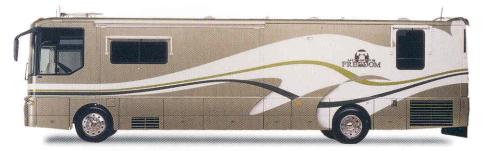

81.93" Wheel Track

The Freedom features an ultra-wide wheel track for enhanced handling and stability.

Fiberglass Roof

Built to a higher standard, Ultimate Freedom features a one-piece fiberglass roof backed with a 10-year limited parts and labor warranty. Fiberglass offers superior strength, attractiveness and durability over rubber roofs found on many competitive models. Over time, rubber roofs are susceptible to chalking, streaking, and degradation, and have less puncture and tear resistance than fiberglass. A rear spoiler and a full-body Dupont[®] Chroma Premier exterior finish add to the distinctive look of the Ultimate Freedom.

Air Intake

The engine air intake is positioned high on the sidewall. This helps prolong filter life and improve engine performance by preventing debris from entering the engine supply.

The Allison® 3000 MH 6-speed electronic control transmission is a proven performer. Its innovative Smart Logic system enables it to learn your driving habits and finetune shift points accordingly for maximum performance.

Air-line System Draining

Draining the air-line system of condensation is recommended on all vehicles with air brakes and air suspension. Automatic system dryers and heated air system drains include remote lanyard controls so you'll never have to crawl under the chassis to perform this routine maintenance on your Freedom.

Side Mounted Radiator

The radiator is mounted on the side of the coach for improved airflow and cooling.

StoreMore® is storage the way it is supposed to be. With the StoreMore Slideout System, the front exterior storage bays actually move with the slideroom for easy access even with the slideroom extended. Storage bays are large enough to accommodate oversized items and storage bay doors feature gas struts and a single-paddle latch for easy, one-handed operation.

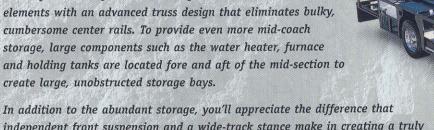

Anti-lock air brakes deliver impressive stopping power. The treadle-style foot pedal is mounted securely to the steel cab deck for maximum feel and braking control.

Ulti-Bay is Winnebago Industries' exclusive monocoque chassis design that provides abundant mid-coach storage, impressive driving and handling performance, as well as 10,000 pounds of towing capacity.+

THE ULTIMATE IN STORAGE DESIGN

Ulti-Bay combines front and rear Spartan® Custom Chassis elements with an advanced truss design that eliminates bulky, cumbersome center rails. To provide even more mid-coach storage, large components such as the water heater, furnace and holding tanks are located fore and aft of the mid-section to

independent front suspension and a wide-track stance make in creating a truly distinctive luxury motor coach driving experience. Ulti-Bay is everything a luxury chassis should be and it's all a part of your Ultimate Freedom.

+ Ultimate Freedom features a tow bar rated at 10,000 lbs. capacity as a standard feature. Actual towing capacity can be further limited by other factors such as the weight of the vehicle as loaded and the type of towing to be performed. Check with your Ultimate Freedom dealer for additional towing specifications.

The OnePlace® Systems Center places important and frequently used switches, gauges, levels and controls in one convenient location so you can easily check them at a glance.

POWER RENERGY MANAGEMENT SYSTEM

Keep your electrical system running smoothly even when operating your central air conditioning on 30 amp shore power. The PowerLine® Energy Management System monitors onboard 110 volt electrical usage and minimizes the nuisance of tripped

campground circuits by regulating the operation of postponable electrical loads during periods of heavy usage. As demand is lowered, PowerLine automatically returns power to the secondary appliances and systems.

COMMITTED TO SERVICE, We back our motor coaches with the best service after the sale in the

- 12-month/15,000-mile basic limited warranty
- TRIPSaver 36-month/36,000-mile warranty on structure

- The height of each model is based on the curb weight of a typically equipped unit on the standard chassis. The actual height of your vehicle may vary by as much as 2" depending on chassis or equipment variations.
- Ultimate Freedom floorplans feature a wide-body design over 96". In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- Your motor coach's load capacity is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motor coach.
- * Not all items available in combination. See dealer for details.
- Capacities shown are tank manufacturer's listed water capacity (W.C.).
 Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- S Standard
- O Optional
- Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR and GCWR as well as adequate trailer brakes. Please refer to your vehicle's operator's manual for further towing information.
- ** See your dealer for complete warranty information.

Winnebago Industries' continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice. Comparisons to other motor coaches are based on the most recent information available.
