It's hard not to love the all-new 2007 Itasca Impulse™. The Impulse offers floorplan flexibility and great amenities at a price guaranteed to please. Six models with abundant storage make it the perfect vehicle for a weekend getaway or a family vacation. Our SmartSpace™ design philosophy focuses on user-friendly features that make the most of the available space so you'll live large and have plenty of room to store your gear in your new Impulse.
Comfort and Variety

Contemporary fabrics and beautiful cabinetry with beadboard doors create a warm, inviting atmosphere you’ll be proud to call home. Satin nickel hardware and your choice of Sierra Maple or Portsmouth Oak finishes complete the look.

The Impulse offers six different floorplans so you can choose the one that’s perfect for you. Most models offer an available entertainment center that can be enhanced with the Home Theater Sound System featuring a DVD player, receiver, amplifier, five recessed speakers and a subwoofer (NA 22B).

A storage drawer below the range top and a large two-door refrigerator/freezer allow you to bring plenty of food for the trip. A microwave is standard and a Magic Chef® three burner range with oven is also available to expand your cooking options.

The comfortable dinette seats four for meals or an afternoon card game and quickly converts to a bed for additional sleeping space.

Entertainment Center The front bunk and ladder on most models can be replaced with an entertainment center featuring a 27” TV, video selection system and the available Home Theater Sound System.

Cabinet Storage Store extra blankets and bedding in the large cabinet over the cab area when you choose the available entertainment center.

Galley The molded double-bowl sink comes with a stylish high-arch faucet that accommodates large pots and pans.

Full-Extension Drawer Slides Cabinet drawers open 100% for easy access to stored goods.
Five Impulse floorplans offer a queen bed with additional sleeping space in the dinette and overhead bunk. The bed in the 28P is part of the SmartSpace rear storage compartment. It flips up, allowing you to travel with oversized items.

Driving the Impulse is a pleasure even for first time RV owners, thanks to a variety of automotive features that make your trip more enjoyable. These include power windows, dual air bags and an auxiliary start/stop switch that helps start your coach if the chassis battery loses its charge. Choose the available rearview monitor for assurance when backing or maneuvering.

**Bedroom** Deep overhead cabinets and a large wardrobe are SmartSpace design elements that provide an abundance of interior storage space.

**Dash** Automotive styling places controls within easy reach. Dual airbags are standard.
The Impulse offers an exterior accessory package featuring a ladder, painted running boards and storage bin covers in the rear compartments of the 28P, 29T and 31C. You can also add an awning (28P, 29T, 31C), which is great for tailgate parties, lazy afternoons or entertaining on a summer evening.

Smart Storage™ allows you to carry more, larger items thanks to the innovative rear/side storage compartment on the 28P, 29T and 31C. It includes attachment points for key tools and accessories, plus recessed storage areas in the floor for added storage flexibility. A water system winterization package helps you prepare for colder months. Add a 4,000-watt Onan® MicroQuiet™ generator for power when and where you need it.

**Painted Steel Running Boards**
The available accessory package includes handy, stylish painted steel running boards.

**Rear/Side Storage**
The recessed area in the rear storage compartment is a great place to store damp items or ice down your favorite drinks. It includes a convenient drain.

**Rear Storage**
The storage bay on the 28P, 29T and 31C is one of the largest C-body storage bays. It is shown here on the 31C with the available exterior accessory package.

**Web TrueLevel**
Eliminate the guesswork when it comes to tank levels with our exclusive TrueLevel™ holding tank monitoring system. It incorporates detector cells that read liquid levels from outside the tank. No probes mean no more corrosion or clogging, just accurate readings time after time.
FLOORPLANS

Note: Dimensions shown are for sleeping space only and may vary due to styling differences. Dashed lines denote overhead storage areas.

#### Specifications Details

- **LP Capacity**: The LP capacity is specified for each model. It is essential for ensuring that the motorhome is equipped with adequate LP storage for extended trips.
- **Holding Tank Capacity - Black/Gray**: This capacity is crucial for managing the water needs of the motorhome, especially when away from water sources.
- **Awning Length**: The length of the awning is significant for providing shade and protection from the sun.
- **Exterior Storage Length**: This dimension is important for understanding the space available for storage outside the motorhome.

#### Chassis Details

- **Overhang & Tag-Along**: These dimensions are critical for ensuring that the motorhome is compatible with various towing situations.

#### Electrical Details

- **Feature**: A variety of electrical features are listed, including powerpoints and AC units.

#### Chassis Details

- **Chassis Feature**: Details about the chassis are provided, including the type of suspension and the type of alternator used.

#### Entertainment Details

- **Entertainment Feature**: Features such as satellite systems and DVD players are listed, enhancing the entertainment options available to the motorhome's occupants.

#### Exterior Details

- **Exterior Feature**: Features such as awnings and exterior storage compartments are detailed, providing information on the motorhome's exterior capabilities.

#### Inside Details

- **Inside Feature**: Features like bunk beds and entertainment centers are listed, giving insights into the motorhome's interior design and functionality.

**Warranty Information**

- **Limited Warranty**: The motorhome comes with a limited warranty that covers the structure, components, and systems. Details about the warranty period and coverage are provided.

**Additional Information**

- **Fire Extinguisher**: A fire extinguisher is standard, ensuring safety in case of emergencies.
- **Roof Vent**: Roof vents are installed to provide ventilation and help maintain a comfortable interior temperature.
- **Ceiling Lights**: Ceiling lights are provided for illumination in various areas of the motorhome.

**Notices and Restrictions**

- **Notices**: Notices such as the ride heights and the maximum gross vehicle weight rating are provided, ensuring safe operation and handling.
- **Restrictions**: Restrictions on the use of certain features, such as the use of the Cassette Toilet, are highlighted.

**Additional Notes**

- **General Notes**: General notes about the motorhome's design and functionality are included, providing a comprehensive overview of the motorhome's capabilities.
Choose from two fabric selections and two wood choices.

Winnebago Industries motor homes are built by Winnebago Industries, the company that defined motor home quality. Today, Winnebago is dedicated to keeping that reputation intact.

We're proud of our process, state-of-the-art facilities and the people who make Winnebago Industries number one. We invite you to visit our factory in Forest City, Iowa, for a first-hand look at the dedication and technology behind every motor home we build.

Whether it’s sending every coach through a high-pressure water tunnel to check for leaks or labeling each individual wire and bar-racing parts to save time and frustration during service, Winnebago Industries engineers also take special care to ensure proper handling and stability.
