Take a moment to enjoy the distinctive flowing lines of the 2007 Itasca Navion. Fire up the Mercedes-Benz five-cylinder turbo-diesel engine that gets an estimated 17 to 19 miles per gallon. Feel the 2.7 liters of German-engineered performance work seamlessly with the 5-speed automatic transmission.

Admire the impressive turning radius, four-wheel ABS disc brakes and independent front suspension that help you glide through the tightest turns. Spend the night in your beautiful new motor home. Then do it all again tomorrow. This is what traveling is all about. This is the Itasca Navion.
**Distinctive**

Navion takes motor home styling in bold new directions with clean lines, contemporary fabrics and satin nickel hardware that is guaranteed to impress. The elegant curves in the frameless cabinetry embody this new look, as does the textured, stainless steel refrigerator façade.

For maximum comfort, Navion provides thermostat-controlled cabin heating and air conditioning with an available heat pump for warmth without using LP. You’ll also appreciate the privacy afforded by the day/night pleated shades.

A handy remote lets you easily play your favorite music on the Clarion® dash radio/CD player, which can be upgraded with the Sirius® Satellite® radio package. Sirius brings you 120 channels of crystal-clear programming and a free six-month subscription.

Enjoy the ride in fully adjustable luxury cab seats with lumbar support for extended trips. The contemporary look of the Navion extends to the dash with an available Brushed Aluminum appliqué for the instrument panel, shift panel and beverage tray.

* Sirius Satellite radio not available in Canada

---

**Dash**
The dash smartly positions everything you need while driving, including a clip to hold your map. When moving between the cab and living area, you’ll appreciate the generous opening afforded by the cutaway cab design. Dual airbags come standard and an available rearview monitor with one-way audio provides added peace of mind when backing and maneuvering. Upgrade the cab seats to UltraLeather™ for a more luxurious ride.

**Galley**
Make quick work of meal preparation and cleanup in a galley that features a large, round, stainless steel sink, a three-burner range top and a microwave/convection oven. Storage is plentiful and easily accessible, and a sink cover creates additional counter space. The available water filtration system provides crystal-clear drinking water to the galley faucet.

**Full-extension Drawer Slides**
Drawers open fully for easy access.
Our SmartSpace™ design philosophy places a premium on innovative features that make the most of the available space, such as the overhead bunk that lifts up for easy access to the cab area. A front overhead storage cabinet can replace the bunk for additional storage space (NA 23H). Even with the bunk, you’ll have plenty of places to store your gear with a wardrobe, cabinets and storage compartments throughout the motor home.

Not only does the contemporary sofa feel as good as it looks, it faces the 20” LCD TV and DVD player for prime viewing (14’’ LCD on 23H). A skylight provides extra climate control with an easy-to-use vent handle, sliding screen and pleated shade.

The bathroom features a flexible showerhead, skylight and a retractable shower door that squeegees itself clean each time it’s opened. You’ll also find a stainless steel sink, chrome fixtures and an abundance of storage.

**Overhead Bunk** Gas struts lift the hinged bunk out of the way for easy cab access during the day. At night it provides a spacious and comfortable 49” x 75” sleeping space. For extra storage, choose the overhead cabinet in the 23J and 23B. It holds more gear for extended trips and is accented with rope lighting for a sophisticated look.

**Dinette** The dinette seats four and houses extra storage. At night this area converts to a comfortable bed.

**Bunk Beds** New for 2007, the 23B features bunk beds in the sleeping area. The bottom bunk flips up to expose the large pass-through storage below. It’s another example of our SmartSpace design philosophy.
**Built for Performance**

Winnebago Industries® is the only motor home manufacturer authorized by Daimler Chrysler® to use the Dodge® Sprinter cut-away chassis. It is built around a turbo-diesel engine that delivers an uncommonly quiet performance with an estimated 17 to 19 miles per gallon and extended service intervals. Little details make a big difference in the Navion, like cab doors that open nearly 90 degrees and the flip-out key holder with a door lock remote.

Our goal is to enhance every aspect of your motor home adventures, right down to every detail. That’s why we package all of your water hookups, electrical hookups, hoses and valves in one service center with easy-to-read labels. You can add the 12-volt heated drainage system to extend your camping and travel season because, when you own a Navion, you’ll never want the trip to end.

**SMART STORAGE** The rear bed in the 23J not only creates a comfortable sleeping space, it flips up to reveal side-by-side storage compartments. One compartment can expand to accept large items like a bike and can even be accessed from outside the motor home. It’s another example of our Smart Storage™ design philosophy that maximizes usable storage space.

**Hitch** Tow your favorite toys with the standard 3,500-lb. hitch with 350-lb. vertical tongue weight.

**Flip-out Key** The ignition key folds into the keyless door lock remote so it’s always handy and won’t poke a hole in your pocket.

**Sliding Storage** An easy-to-use sliding exterior storage bin seals tightly to protect your things from dirt and moisture. It even includes a drain plug that makes cleaning easier.

**Extension Ladder** Mounted to the back wall with a folding design for quick use and storage.
Eliminate the guesswork when it comes to tank levels with our exclusive TrueLevel™ holding tank monitoring system. It incorporates detector cells that read liquid levels from outside the tank. No probes means no more corrosion, just accurate readings time after time.

**Exterior Service Center** Houses water, drainage facilities and the available exterior wash station. Electrical hookups can also be found here, including a power cord with the QuickPort service connection hatch. This hatch allows you to close the compartment door even when connected to hookups at the campground.

**Engine**

- **2.7L CDI 5-cylinder, turbo-diesel, 154-hp**

**Transmission**

- Automatic 5-speed transmission w/tip shift

**Brakes**

- 4-wheel ABS w/skid control

**Exterior**

- Fiberglass, extension, entrance w/separate screen door, deadbolt lock, remote keyless entry

**Interior**

- Front overhead w/hinged 1-piece mattress, bunk ladder, privacy curtain

**Furniture**

- Sofa w/interior & exterior access to storage below both seats
- Sofa w/interior & exterior access to storage below front seat
- Adjustable headrest, multi adjustable slide/recline
- Power Cab Windows, Powerpoint
- Curtains

**Electrical**

- 12-Volt DC Powerpoint
- AC breaker panel, DC automotive-power cord
- Ground Fault Interrupter

**Water**

- 13,500 BTU, ceiling-ducted w/wall thermostat
- 25,000 BTU, (23H & 23J ducted in floor, 23B ducted above floor)
- 6-gallon electronic ignition, 120 VAC/LP gas
- 6-gallon electronic ignition, LP gas
- 10 BC, smoke, carbon monoxide, Detectors/Alarms
- Water Heater 6-gallon, electric, demand

**Heating**

- Furnace
- AC Heat Pump

**Lighting**

- Day/night, pleated lucent trim on roof skin
- Day/night, pleated

**Systems**

- Roof Vent dual-control w/flexible showerhead, vented w/light & fan, powered ventilator fan
- Safety Detectors/Alarms ground fault interrupter
- 6-gallon electronic ignition, LP gas
- 10 BC, smoke, carbon monoxide, Detectors/Alarms
- Water Heater 6-gallon, electric, demand
- Furnace
- AC Heat Pump

Visit us on the web for more info on all of our motor homes and a host of web-exclusive content.
Irruption motor homes are built by Winnebago Industries, the company that defied convention. In 1955, Winnebago Industries recognized the need for a new type of vehicle. The company that transformed the motor home concept into a way of life.

Today, Winnebago Industries remains true to the original concept of a home on wheels. A home that travels. A home that brings family and friends together in a world of unforgettable memories.

The Navion features a crowned, one-piece fiberglass roof. It was the first time any motor home manufacturer took a risk by using fiberglass. But Winnebago Industries engineers were confident that fiberglass was superior to any other roof material. Today, fiberglass is known as the industry’s standard roof material.

We back our motor homes with the industry’s strongest motor home roof skin warranty. Fiberglass offers superior strength and durability.

Built by Winnebago Industries

The Navion is reinforced throughout using advanced automotive materials and processes such as the 12-stage automotive-style dip tank process to apply an advanced electrodeposition coating on critical steel components for unmatched corrosion protection. Winnebago Industries engineers also take special care to ensure proper handling and stability.

Strong as Steel

Fiberglass Roof

E-Coating

Today, Winnebago Industries brings that reputation for quality and its 48-year history to bear in every motor home we build. Itasca owners are like family. Joining the Winnebago-Itasca Travelers Club is a great way to meet and travel with other Itasca enthusiasts. Members enjoy:

• Caravans and rallies
• National dealer service network
• Standard 10-year limited parts-and-labor roof skin warranty
• 36-month/36,000-mile limited warranty on structure
• 12-month/15,000-mile basic limited warranty
• TripSaver guarantees that in-stock warranty parts ship directly to your dealer within 24 hours.
• Complimentary 24-hour roadside assistance program
• RV travel benefits
• Local and state group activities
• TripSaver Fast Track Parts. TripSaver guarantees that in-stock warranty parts ship directly to your dealer.

ATENTION TO DETAIL... Whether it’s sending every coach through a high-pressure water tunnel to check for leaks or labeling each individual wire and bar—each coach undergoes a 30-point inspection. Winnebago Industries engineers manufacture this “home on wheels” to provide exceptional products, service and support. Winnebago Industries is proud to be the only manufacturer to receive this award every year since its inception.
