We're proud of our process, state-of-the-art facilities and the people who make Winnebago Industries number one. We invite you to visit our factory in Forest City, Iowa, for a firsthand look at the dedication and technology behind every motor home we build.

Recognized Quality

The Recreation Vehicle Dealer Association annually rates RV manufacturers and awards the Quality Circle award to manufacturers who provide exceptional products, service and support. Winnebago Industries is proud to be the only manufacturer to receive this award every year since its inception.

Committed to Service

We back our motor homes with the industry's best service after the sale.

- 12-month/15,000-mile basic limited warranty
- 36-month/36,000-mile warranty on structure
- Standard 10-year limited parts-and-labor roof skin warranty
- Complimentary 24-hour roadside assistance program
- TripSaver Fast Track Parts. TripSaver guarantees that in-stock warranty parts ship directly to your dealer within 24 hours.
- National dealer service network

Your Access to adventure.

The 2008 Winnebago Access™ gives you the freedom to go where you want to go, stay where you want to stay, and do it in comfort and style with a price tag that is sure to please. Seven Access models provide a unique layout for your lifestyle and each one is loaded with user-friendly amenities that only our SmartSpace™ design philosophy could make possible. Plus, you’ll find an abundance of storage space that makes it easy to bring along your favorite gear. Make the Winnebago Access your pass to endless cross-country entertainment.
The Access greets you with comfort and amenities for every personality. Style mavens will appreciate the contemporary fabrics and beautiful cabinetry with satin nickel hardware and your choice of Sierra Maple or Portsmouth Oak finish. For the audiophile, an available entertainment center (NA 22B) comes with a 27” TV and an available Home Theater Sound System for a full cinematic experience.

The family cook can prepare exquisite meals on the Magic Chef® three-burner range top. A microwave comes standard and an oven/range can replace the storage drawers below the range to increase your cooking options.

The well-designed cockpit includes features such as power windows, dual air bags and power locks. Close at hand is an auxiliary start circuit, which assists the chassis battery when you need an extra boost to start the engine. Select the available rearview monitor system for added convenience when backing up and maneuvering.

The Entertain Center Upgrade to the Home Theater Sound System (NA 22B) with a DVD player, amplifier, receiver, five recessed speakers and a subwoofer that makes evenings at home an entertainment experience.

Dinette The dinette seats four comfortably and easily converts to a comfortable bed. A U-shaped dinette is available on the 28P and 29T.

Made for you

WEB Select a Key Feature

The WEB icon designates a Winnebago Industries Key Feature. For further in-depth information and photos, use the Drop-down Menu or click on the ‘Key Features’ page at winnebagoind.com.
There is no shortage of spacious sleeping accommodations in the Winnebago Access. Every Access comes standard with a roomy overhead bunk. Extra guests are no problem; the dinette and sofa (22B, 29T, 31C and 31J) each convert into comfortable beds for added sleeping space.

Most floorplans include a private master bedroom with a queen-size bed. A wardrobe and deep overhead cabinets provide plenty of storage space for blankets and linens. The bed on the 28P even flips up to reveal a cavernous storage compartment.

Sleep in comfort

Bedroom Enjoy the privacy of a spacious master bedroom.

Dinette Bed The dinette provides a cozy sleeping area at night.

Sofa/Bed Switch from a relaxing sofa to a comfortable bed in seconds (NA 28P).

Bunk Bed The standard front bunk includes a convenient ladder, privacy curtain and a ceiling vent for added light and ventilation. Add a 19” LCD TV and DVD player to the front bunk area for extra entertainment.
Eliminate tank-level guesswork with our exclusive TrueLevel™ holding tank monitoring system. It incorporates detector cells that determine liquid levels from outside the tank. No probes means no more corrosion, just accurate readings, time after time.

Running Boards Painted steel running boards look great and make for easy entrance and exits.

More Storage The Access has room for all your favorite gear with its large rear exterior storage areas on the 24V, 26A, 28P, 29T and 31C.

Innovative Storage This adaptable storage space is great for damp or loose items, or for chilling your beverages. There’s even a drain plug to drain out water (NA 22B and 24V).

Load up your Access with the available exterior accessory package. It features a rubber-tread stepwell, ladder, painted running boards and a storage bin cover for the rear compartment (28P, 29T and 31C). The large cover for the center storage bin can even be converted to a table for a leisurely picnic. You can also add an awning for tailgate parties, lazy afternoons or entertaining on a summer evening.

Smart Storage™ allows you to carry several large items thanks to the innovative rear/side storage compartment on the 28P, 29T and 31C. It includes attachment points for key tools and accessories, plus recessed storage areas in the floor for added storage flexibility. A water system winterization package helps you easily prepare for storage. Add a 4,000-watt Cummins Onan® MicroQuiet™ generator for power when and where you need it.

WEB TrueLevel Eliminate tank-level guesswork with our exclusive TrueLevel™ holding tank monitoring system. It incorporates detector cells that determine liquid levels from outside the tank. No probes means no more corrosion, just accurate readings, time after time.
Note: Dimensions shown are for sleeping space only and may vary due to styling differences. Dashed lines denote overhead storage areas.

**Warranty

- 12-month/15,000-mile basic warranty, 36-month/36,000-mile limited warranty on structure; 10-year limited parts & labor warranty on roof skin

- 1 The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please consult your dealer for further information.

- 2 Access floorplans feature a wide-body design - over 96. In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.

- 3 The load capacity of your motor home is designed by weight, not by volume, so you cannot necessarily use all available space when loading your motor home.

- 4 Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.

- 5 Capacities shown are tank manufacturer’s listed water capacity (W.C.). Actual fill LP capacity is 80% of holding due to overfilling prevention device on tank.

- 6 Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GWVR, GAWR, and GCWR as well as adequate trailer brakes. Please refer to the Operator’s Manual of your vehicle for further towing information.

- 7 See separate chassis warranty.

- 8 See your dealer for complete warranty information.

- NA Not Available
- $ Standard
- $ Optional
- $ Not all items available in combination. See dealer for details.

- WinnieBago Industries® continuing program of product improvement makes specifications, equipment, model availability, and prices subject to change without notice. Comparisons to other motor homes are based on the most recent information available at printing.
Choose from two fabric selections and two cabinet wood choices.

Winnebagoind.com Visit us on the web for more info on all of our motor homes, the latest product updates and a host of web-exclusive content.
Winnebago motor homes are built by Winnebago Industries, the company that defined motor homes. The company that built its reputation on quality construction. The company that transformed the motor home concept into a way of life.

Today, Winnebago Industries brings that reputation for quality and its 49-year history of motor home innovation to the design and construction of every motor home. It’s all a part of SuperStructure, our exclusive system of proprietary structural components that instills each motor home with improved strength and durability.

**Solid Foundation** Steel and aluminum truss work provides a solid, flat foundation for the floor and sidewalls. Winnebago Industries engineers also take special care to distribute the weight of components to ensure proper handling and stability.

**Thermo-Panel® Sidewalls** Invented by Winnebago Industries, Thermo-Panel construction combines a fiberglass panel, high-density, block-foam insulation and aluminum support structures to create some of the most durable, lightweight sidewalls in the industry.

**Attention to Detail** Whether it’s sending every coach through a high pressure water tunnel to check for leaks or labeling each individual wire and bar-coding parts to save time and frustration during service, Winnebago Industries considers every detail to ensure your Winnebago motor home provides you with years of pleasure.

**Strong as Steel** Appliances are secured directly to embedded steel plates for added safety.

**Fiberglass Roof** The Access features a crowned, one-piece fiberglass roof, backed with a 10-year limited parts-and-labor roof skin warranty. Fiberglass offers superior strength, attractiveness and durability over the rubber roofs found on many competitive models which can chalk, streak and degrade over time. Fiberglass also provides increased puncture and tear resistance.

**E-Coating** Winnebago Industries employs an exclusive 12-stage automotive-style dip tank process to apply an advanced electrodeposition coating on critical steel components for superior corrosion protection.

**Interlocking Joints** The floor, sidewalls and roof are all integrally connected using interlocking joints. This creates a coach body that acts as a cohesive unit for improved strength and durability.

**Take a Tour** We’re proud of our process, state-of-the-art facilities and the people who make Winnebago Industries number one. We invite you to visit our factory in Forest City, Iowa, for a first-hand look at the dedication and technology behind every motor home we build.
